

311 Service Request Overview for City Council

Month July, 2012

Dear Council Members,

311 is an important component of Philadelphia's customer service strategy. The following report provides information about the service requests for which your constituents are contacting 311 . We have used incident addresses to map calls, e-mails, etc. from your district and have provided the Top Ten (10) service related reasons people contacted 311 during the month of July 2012.

Appendix A provides information related to the specific data gathering approach.

Appendix B provides additional information on each "Top 10" category – including a breakdown of which districts drive calls for that service request. This data might be powerful for you when addressing interest groups or considering focus points.

Appendix C provides definitions of the service requests referred to in this report.

We would be pleased to host a 311 center visit or come to your neighborhood meetings to describe more about our customer service approach more broadly and 311 more specifically. We would also be happy to answer any questions about this report.

Regards,

Sheryl Johnson

Appendix A: Data Definition

How the figures and charts are derived

311 is able to identify district activity by tracking the incident address for calls, in-person visits, etc. regarding requests for services. In mapping the activity to Council districts, we took the following approach:

1. We pull data from the 311 Database for all Service Request added during the month. GIS mapping software determines the Council District for each request based on the Incident Address.
2. NOTE: 2% of service requests for the period 7/1/12 – 7/31/12 contained an address not recognized by GIS. These are not included in the reports. However, please be assured that service was provided for these requests.
