

**311 Service Request
Overview for City Council
Month Ending January 2010**

Dear Council Members,

311 is an important component of Philadelphia's customer service strategy. The following report provides information about the service requests for which your constituents are contacting 311. We have used incident addresses to map calls, e-mails, etc. from your district and have provided the Top 10 reasons people contacted 311 during the month of January 2010 (please refer to Appendix A for the specific data gathering approach).

Appendix B provides additional information on each "Top 10" category – including a breakdown of which districts drive calls for that service request. This data might be powerful for you when addressing interest groups or considering focus points.

Appendix C provides definitions for each of the service requests referred to in this report.

We would be pleased to host a 311 center visit or come to your neighborhood meetings to describe more about our customer service approach more broadly and 311 more specifically. We would also be happy to answer any questions about this report.

Sincerely,

Rosetta C. Lue,
311 Contact Center Director

Appendix A: Data Definition

How the figures and charts are derived

311 is able to identify district activity by tracking the incident address for calls, in-person visits, etc. regarding requests for services. In mapping the activity to Council districts, we took the following approach:

1. We pull a report from the 311 Database based on Incident Address. The report is then sent to GIS for determination of City Council District for each address.
2. The data is then uploaded to the mapping software and can be viewed on the City's Intranet at web address: maps.phila.gov/311
3. NOTE: 0.3% of service requests for the period 1/1/10 – 1/31/10 contained an address not recognized by GIS. These are not included in the reports. However, please be advised that service was provided for these requests.
