

Investing in Educating our Children

Would you be willing to invest to help our students succeed?

**Every dollar counts, together we can
better educate our children.**

The Mayor's Proposal to support an increased investment in educating our children would mean a typical homeowner would contribute an additional **\$104 per year or less than \$9 per month** for public education.

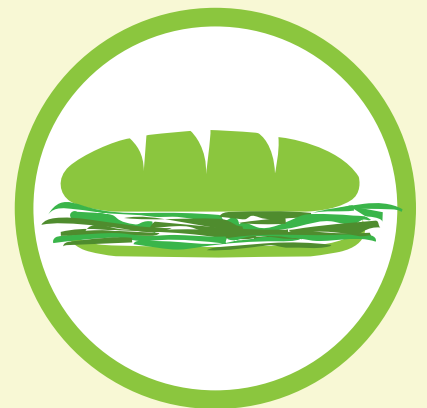

\$104 per year is:

less than the cost of
1 pizza per month

less than the cost of
4 soft pretzels a week

less than the cost of
1 cheesesteak once a month

Your investment would:

Provide **art & music programs, after-school activities & sports**

Offer **advanced programming** to help students thrive

Provide social, emotional, & behavioral health **supports** to students in need
