

Fisher Park Recreation Center in District 3 got the P3 treatment. In support of District Supervisor John Smeltzer's pursuit to make District 3 the "Garden District" of PPR, Seasonal Horticulturist Carol Pollard Ndeti and the Operations Crew of District 3 renovated two garden beds full of invasive weeds and tree seedlings into something a little more beautiful. The crew worked hard, getting down and dirty with some who never gardened before getting on their hands and knees to give it a try for the first time. Annual Snapdragons and Begonias were planted and thanks to the Horticulture Center for providing the plants. Although the official P3 program is still accepting applications for fall plantings, this was a great way to add immediate support to an Operations project. Great job guys...you rock!
