

Michael is a 13-year old boy with a wonderful smile. While he can be slow to warm up, he is a friendly child with a great personality. He loves to play video games and basketball with his friends. His favorite football team is the Philadelphia Eagles. He also loves the Marvel Comic Cartoons, wrestling, movies, and amusement and water parks. His perfect day would consist of eating water ice; playing basketball and going shopping with his friends. He also enjoys listening rap and gospel music.

Michael is in the 6<sup>th</sup> grade with an IEP. His favorite classes are science, math and gym. He does not like reading. Michael has several career goals including becoming a professional athlete and a veterinarian. His favorite holiday is Christmas, because he enjoys all the gifts he receives, but his prized possession is a picture of his mother.

Michael receives therapeutic services and medication management to address some anger-management issues. At times, he can be a little too playful with peers, but overall, he interacts well with all ages of children and adults. He is currently in a treatment foster care home where he has daily and weekly chores to complete such as keeping his bedroom neat; cleaning the bathroom; sweeping and wiping the steps down.

If Michael was granted three wishes it would be: to see his brother again; to be a professional basketball player; and to have a lot of money. He does not currently have contact with his brother but sibling visits will need to be arranged. Michael needs a family that will provide him with a structured and loving home. Any family wishing to adopt Michael would need to be Treatment Foster Care trained.
