

Child Car Seat Week – September 15-21, 2013

Car crashes are a leading cause of death for children in the United States. The best way to protect them in the car is to put them in the right seat, at the right time, and use it the right way. There are so many car seat types and models, how do you know which one is right for your child? The right car seat or booster seat fits your child and your car. Not only will your child ride as safely as possible, you will be establishing the foundation for a lifelong habit of seat belt use every time your child travels. Learn out how to find a free car seat inspection station below!

Visit: <http://www.nhtsa.gov/> and find a car seat inspection nearest you. Certified technicians will inspect your child seat, in most cases for free of charge and show you how to correctly install and use it.

The screenshot shows the NHTSA website's 'Child Safety' page. At the top, there are navigation links for 'DRIVING SAFETY', 'VEHICLE SAFETY', 'RESEARCH', 'DATA', 'LAWS & REGULATIONS', and 'ABOUT NHTSA'. The main heading is 'Child Safety' with a sub-heading 'IS YOUR CHILD IN THE RIGHT CAR SEAT?'. Below this, there is a paragraph of text and a video player titled 'The Right Seat'. A red arrow points from the 'CAR SEAT HELP' button on the page to the 'Child Car Seat Inspection Station Locator' tool.

The screenshot shows the 'Child Car Seat Inspection Station Locator' tool. It features a map of Philadelphia and surrounding areas with orange markers indicating inspection stations. A list of three stations is provided: 1. St. Christopher Hospital for Children, 2. Niero Auto Body, and 3. PA State Police. The tool also includes a 'DIRECTIONS' section with input fields for 'From Here' and 'To Here', and a 'NEW SEARCH' section with a 'Search By State' dropdown menu. A small image of a child car seat is visible in the top right corner of the tool's interface.
