CDC National Immunization Survey, 2011

HPV Immunization, Females: Philadelphia vs Locations w/HPV School Mandates

CDC National Immunization Survey, 2011

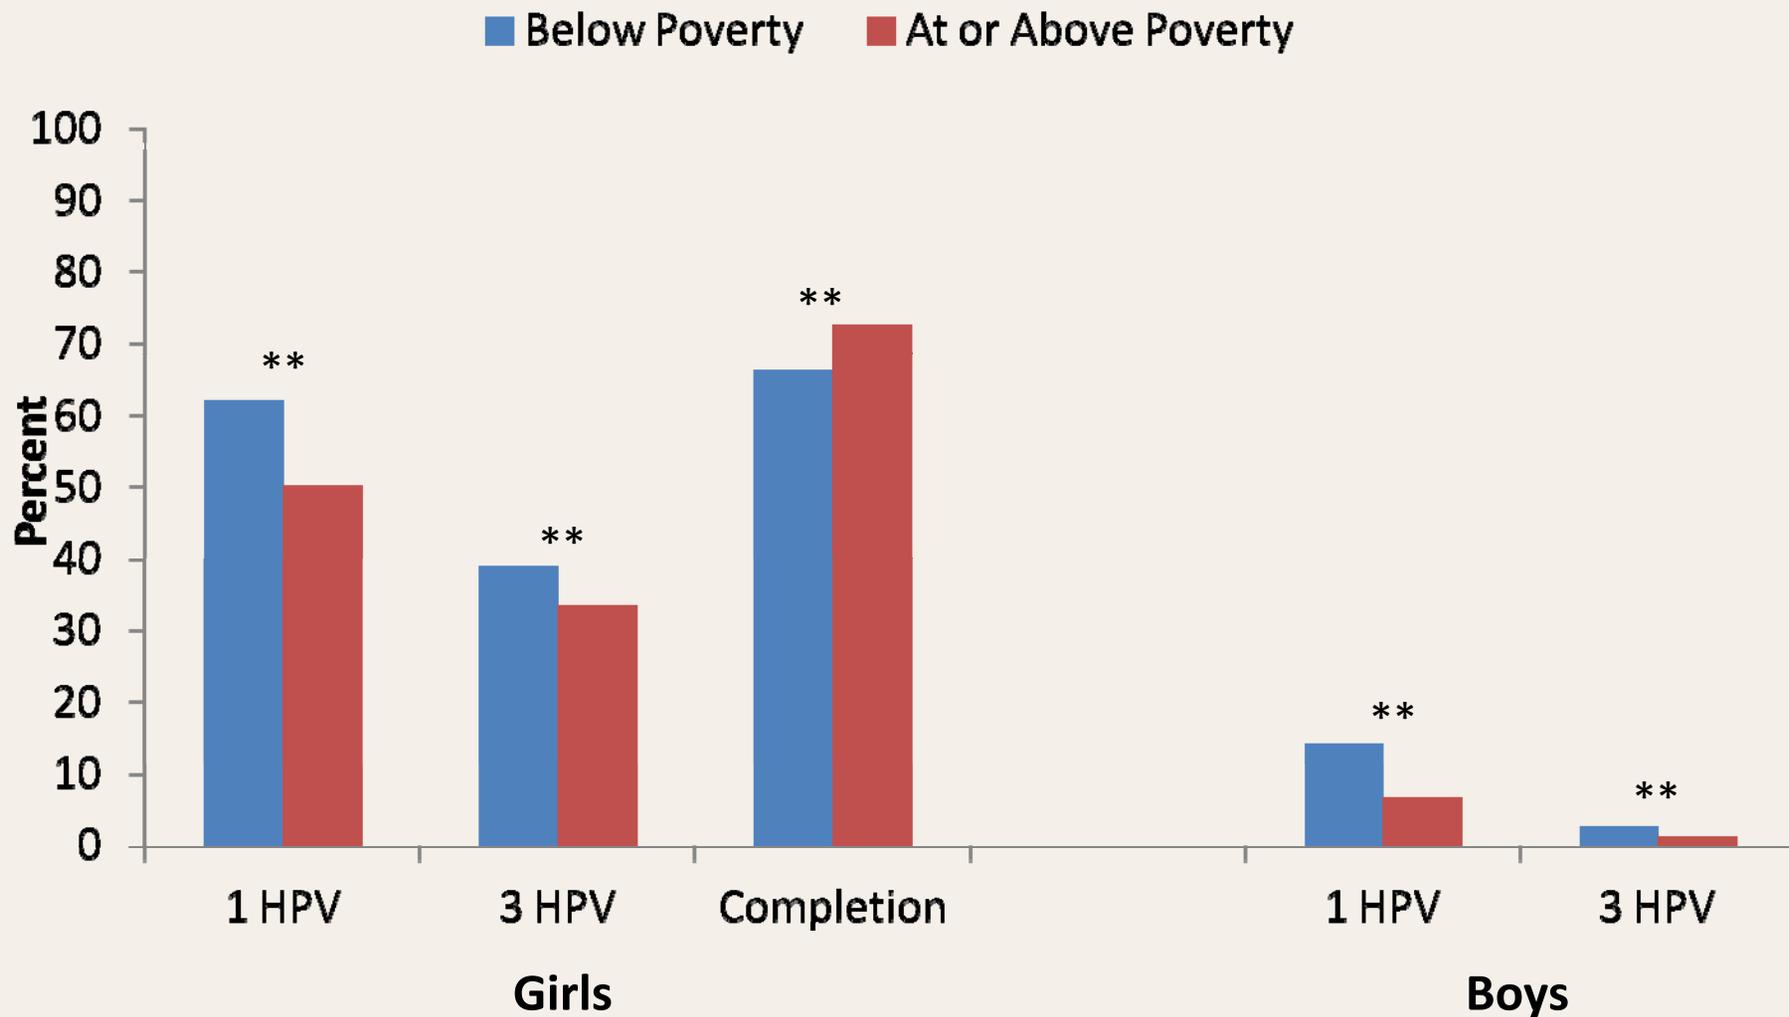

HPV Vaccination Estimates among Adolescents by Race/Ethnicity , NIS-Teen, United States, 2011

** Statistically different ($P < 0.05$) from White-NH.

Completion rate is calculated among teens who had at least 24 weeks between the first HPV dose and the NIS-Teen interview date.

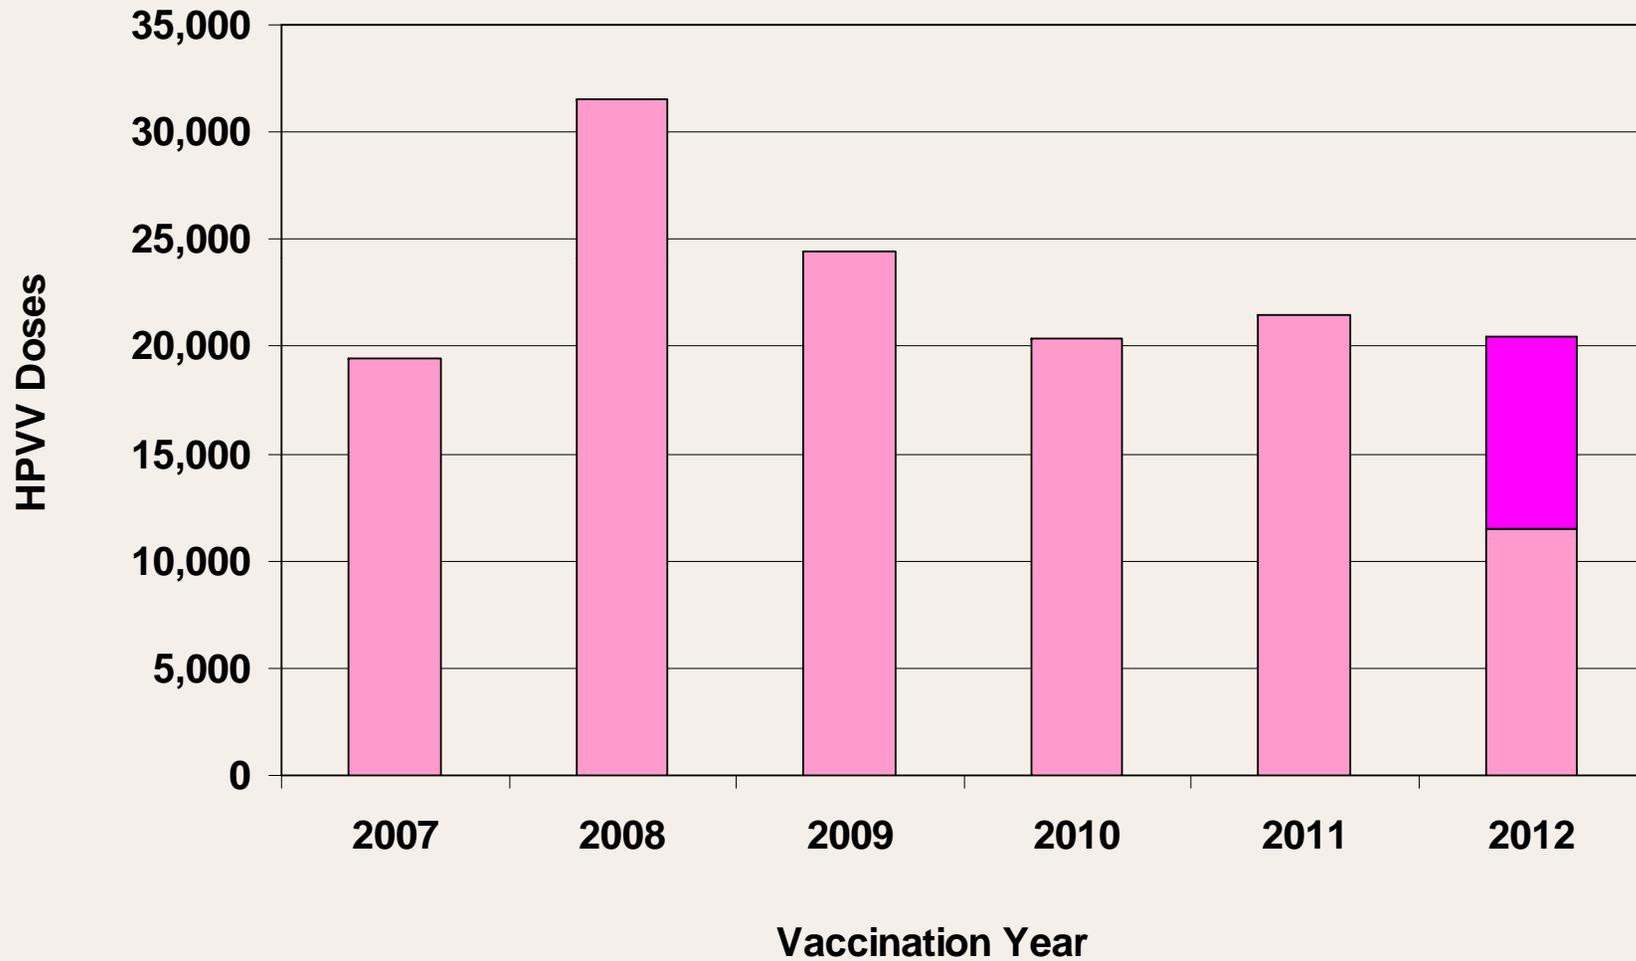

HPV Vaccination Estimates among Adolescents by Poverty Status, NIS-Teen, United States, 2011

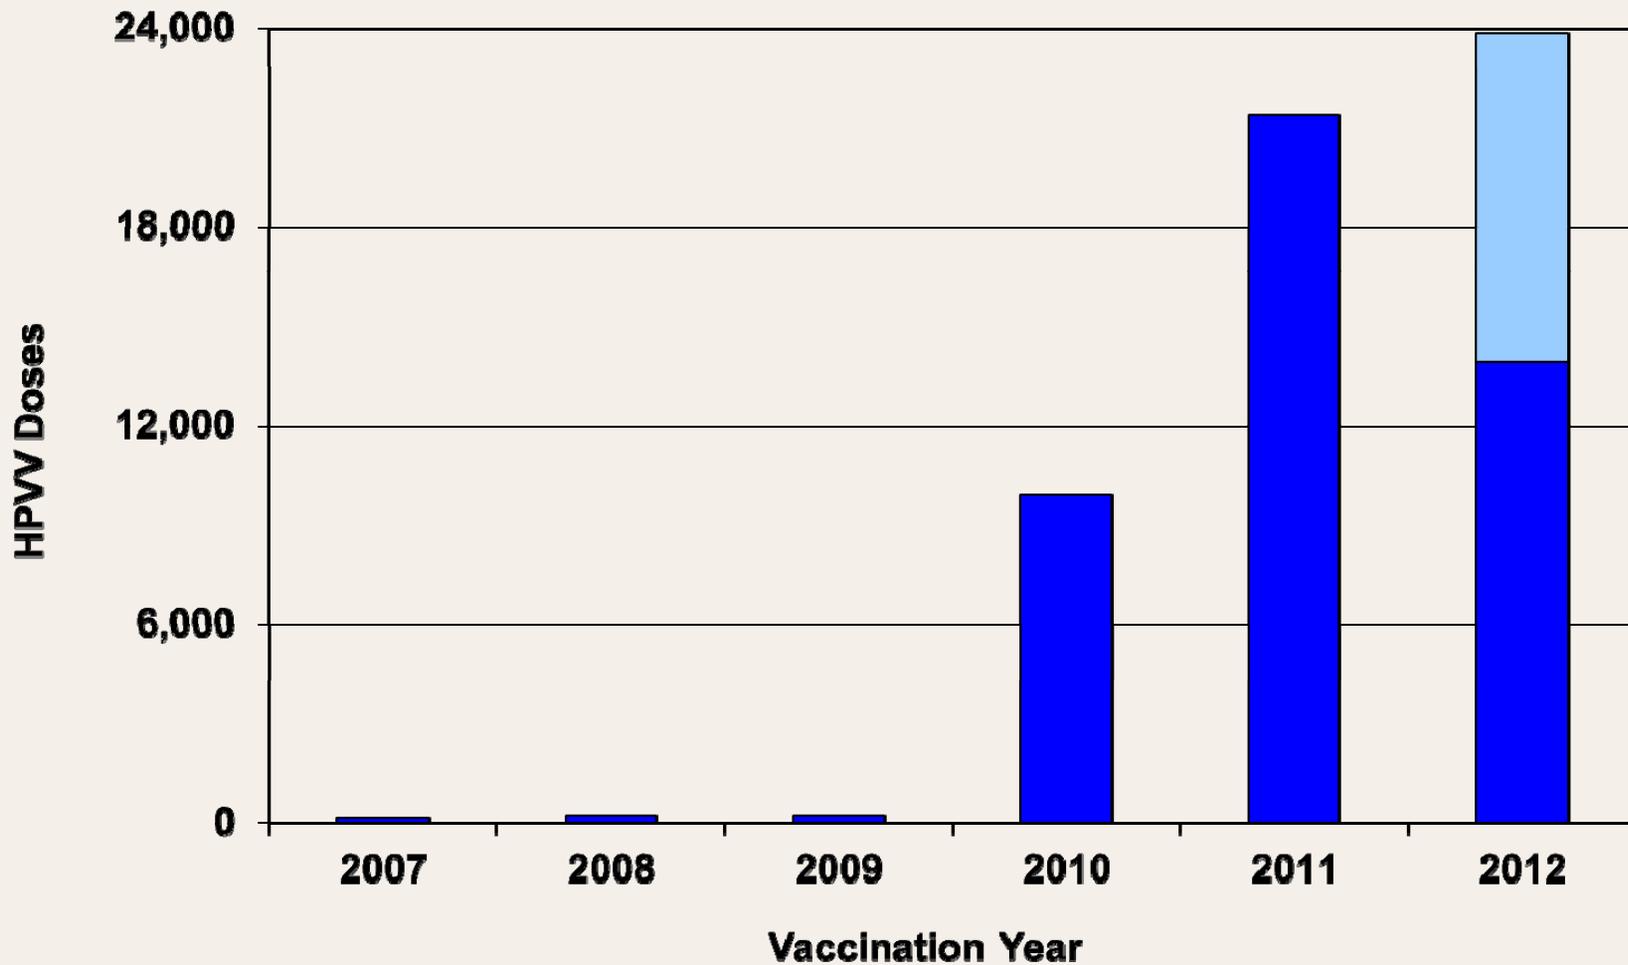

** statistically different ($p < 0.05$)

Completion rate is calculated among teens who had at least 24 weeks between the first HPV dose and the NIS-Teen interview date.

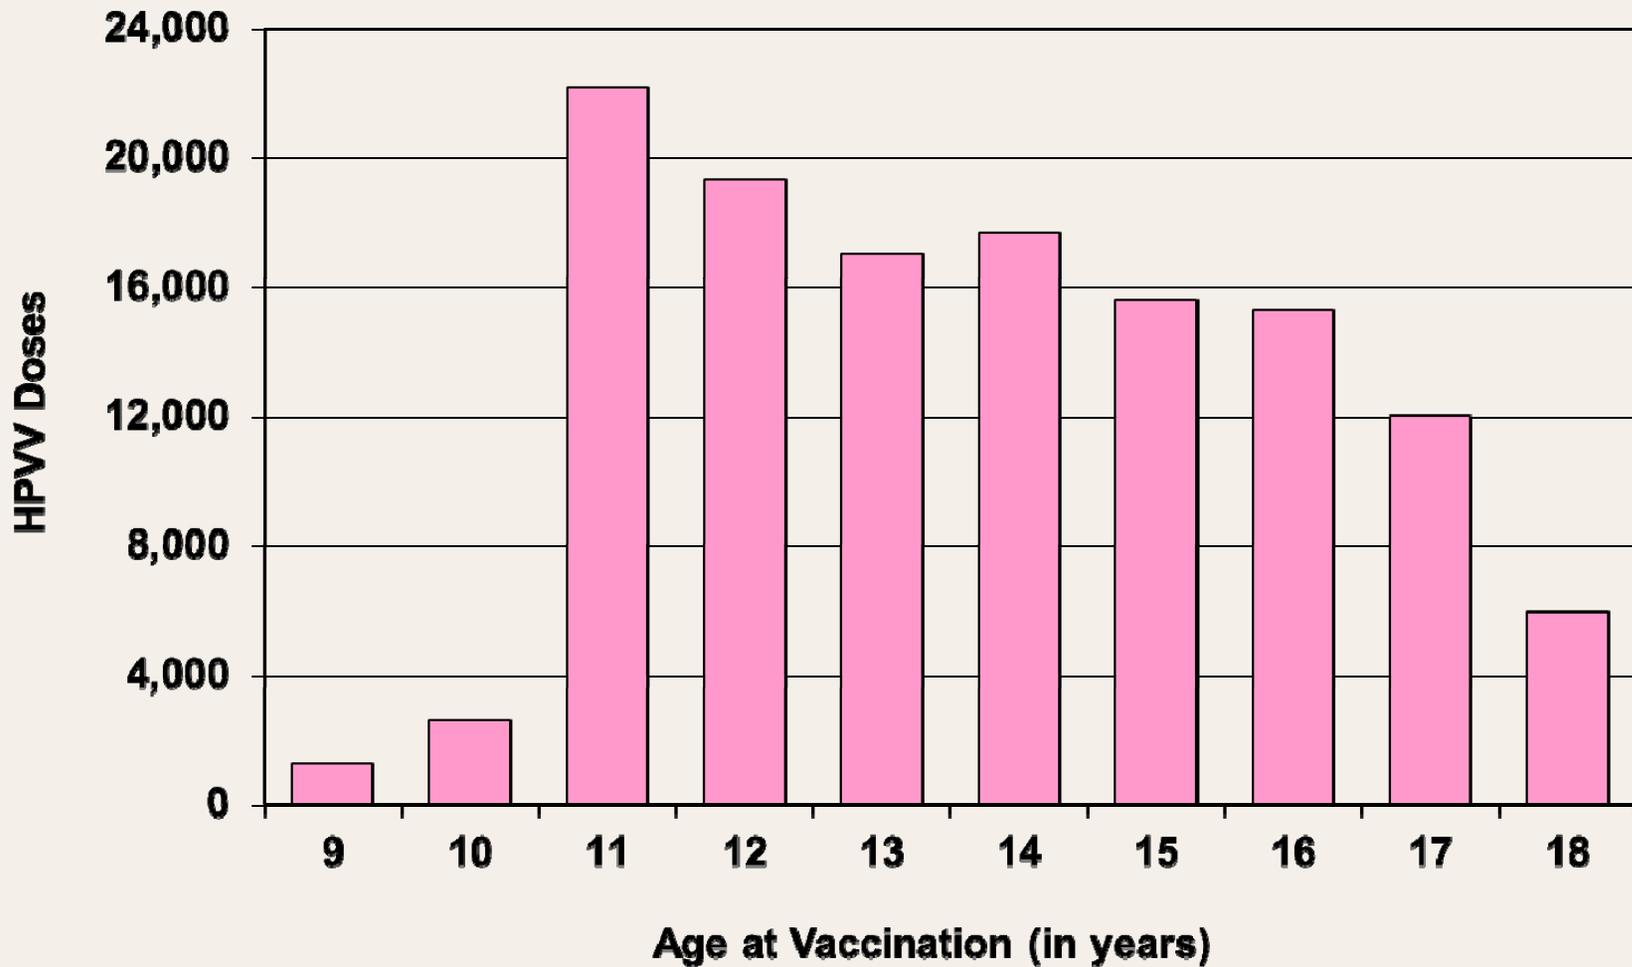

HPV Doses for Adolescent Females by Year of Vaccination, Philadelphia 2007-2012

HPV Doses for Adolescent Males by Year of Vaccination, Philadelphia 2007-2012

HPV Doses for Adolescent Females by Age at Vaccination, Philadelphia 2007-2012

Why is Philadelphia doing so well with HPV Vaccine?

- Vaccine financing
- Local provider acceptance & availability
- Relationship between providers, insurers, & PDPH
- Lack of organized opposition
- Expanded access through non-traditional venues

HPV can cause cancer and genital warts. But luckily you can prevent it with a vaccine.

It's FREE and CONFIDENTIAL.
