

MANAGING DIRECTOR'S DIRECTIVE NO. 24

MAINTENANCE OF SNOW REMOVAL EQUIPMENT

To insure that all City snow removal equipment is in proper working order, the automotive maintenance personnel of the Departments of Public Property and Streets are directed to annually inspect all of the City's major pieces of snow removal equipment during the period April 1 to September 30 of each year.

The Streets Department is responsible for inspecting and repairing all equipment assigned to it. Public Property is responsible for inspecting all other City equipment and taking appropriate measures to insure repair. It is the responsibility of the individual department to have needed repairs made, following normal City repair procedures.
