

MANAGING DIRECTOR'S DIRECTIVE NO. 27

ENERGY CONSERVATION

(Formerly "President Nixon's Message on Energy Curtailment".)

In order to conserve fuel, the following steps will be taken immediately within the City departments and agencies:

1. Approximately one of every three light bulbs or other lighting devices will be disconnected except in cases where this has caused hardship.
2. Supervisors will insure that within public buildings all except emergency lighting is turned off at the end of the working day.
3. Heating in all public buildings will be set at 68 degrees. Cooling will be set at 78 degrees. These standards will not apply to Health facilities.
4. All exterior public lighting, particularly street lighting, will not be affected by this directive as a matter of public safety.

Managing Director
