

RISK MANAGEMENT PRESENTS

"Breathing Life Into Safety"

SUMMER DRIVING: COOLER HEADS IN HOTTER WEATHER

Upcoming Safe Driver Classes:

Distracted Driver:

07/17/2017
MSB 16th Fl. Rm E
10 am-12 pm

08/03/2017
MSB 16th Fl. Rm Y
10 am-12 pm

Rules of the Road:

07/27/2017
TBD
10 am-12 pm

08/29/2017
MSB 16th Fl. Rm E
10 am-12 pm

Defensive Driver:

08/18/2017
MSB 16th Fl. Rm E
8:30 am-12:30 pm

Questions contact:

As we enter the dog days of summer our city is getting busier and busier. From field trips to vacationers, Philadelphia is a very popular destination in the summer. Whether we are driving for business or pleasure the influx of people may impact our days. We may not be able to control how the visitors drive, but we can control how we react to them. Here are some tips on defensive driving.

Eight Secrets of Super Driving

When you drive defensively, you're aware and ready for whatever happens. You are cautious, yet ready to act and not put your fate in the hands of other drivers. Per the U.S. Department of Transportation, 90% of all crashes are attributed to driver error. Following these defensive driving tips can help reduce your risk behind the wheel:

1. Think safety first.

Avoiding aggressive and inattentive driving tendencies yourself will put you in a stronger position to deal with other people's bad driving. Leave plenty of space between you and the car in front. Always lock your doors and wear your seatbelt to protect you from being thrown from the car in a crash.

2. Beware of your surroundings and pay attention.

Check your mirrors frequently and scan conditions 20 to 30 seconds ahead of you. Keep your eyes moving. If a vehicle is showing signs of aggressive driving, slow down or pull over to avoid it. If the driver is driving so dangerously that you're worried, try to get off the roadway by turning right or taking the next exit if it's safe to do so. Also, keep an eye on pedestrians, bicyclists, and pets along the road.

3. Do not depend on other drivers.

Be considerate of others but look out for yourself. Do not assume another driver is going to move out of the way or allow you to merge. Assume that drivers will run through red lights or stop signs and be prepared to react. Plan your movements anticipating the worst-case scenario.

4. Follow the 3- to 4-second rule.

Since the greatest chance of a collision is in front of you, using the 3- to 4-second rule will help you establish and maintain a safe following distance and provide adequate time for you to brake to a stop if necessary. But this rule only works in normal traffic

under good weather conditions. In bad weather, increase your following distance an additional second for each condition such as rain, fog, nighttime driving, or following a large truck or motorcycle.

5. Keep your speed down.

Posted speed limits apply to ideal conditions. It's your responsibility to ensure that your speed matches conditions. In addition, higher speeds make controlling your vehicle that much more difficult if things go wrong. To maintain control of your vehicle, you must control your speed.

6.

Have an escape route.

In all driving situations, the best way to avoid potential dangers is to position your vehicle where you have the best chance of seeing and being seen. Having an alternate path of travel also is essential, so always leave yourself an out — a place to move your vehicle if your immediate path of travel is suddenly blocked.

7. Separate risks.

When faced with multiple risks, it's best to manage them one at a time. Your goal is to avoid having to deal with too many risks at the same time.

8. Cut out distractions.

A distraction is any activity that diverts your attention from the task of driving. Driving deserves your full attention, so stay focused on the driving task.

If you're interested in taking a defensive driving class, Risk Management has the Safe Driver Series. The series has three components: Rules of The Road, Distracted Driving, and Defensive Driving.

Safe driving!
