To whom it may concern,

Once again I am writing to implore you not to raise the water bill. I remember well when the bill came once a year and was between one and two hundred dollars. It then went to 4 times a year and was basically the same amount. Finally it was made a monthly bill and residents were told that it was being done to make it easier for us to handle the bill but that we shouldn't worry because the rates would be the same. My water bill is over \$55.00 a month now. I understand that to most of you this isn't an issue but for seniors and those disabled it is a hardship especially since the city once again wants to raise the property taxes. I am disabled and my husband is 71 years old. We live on a very tight budget and raising another bill is a hardship !
