To Whom It May Concern,

It is absurd that you are even considering a rate increase to the water bill. Following the storm water run off charges creating a significant increase in your revenue you should have ample funds in your coffers not to need/ want / require an additional increase in the water bill.

I urge you to discontinue to pursue a rate increase as this will harm the most working families, the poor and those who are most vulnerable to any change in the bill.

Best regards,

Joseph Bernstein,
