

May 3, 2018

To the WRB and participants in the technical hearings:

During the public hearing held at 5th and Huntingdon, the Water Commissioner Debra McCarty stated that she had investigated claims that safety protocols were not followed during sewer inlet lateral repairs at my residence in Philadelphia and “we (PWD) have investigated the claims and followed up and found no issue really”.

I am seeking, as discovery, copies of any and all reports the Commissioner used to investigate the claims, any and all notes and reports Water Department Staff created during the investigation and the names and positions of any and all Philadelphia Water Department employees and/or agents who conducted the investigation.

Sincerely,

Michael Skiendzielewski
