

Overdose happens fast- make sure you carry naloxone.

Make sure someone is around- they can give you naloxone in case of overdose.

If you think it's an overdose, call 911. They have more naloxone.

Beware of Fentanyl

Fentanyl is a powerful opioid painkiller that causes almost immediate overdose

Fentanyl can be in any drug...

It is often added to other street drugs
without people knowing.

Street drugs can include:

- Heroin
- Cocaine/Crack
- Meth
- Counterfeit prescription meds

**Fentanyl is 30-50x more
potent than heroin.**

**Extremely
small
amounts of
fentanyl can
be deadly.**
