Request for Exemption from City of Philadelphia Operating Permit Requirements

The facility listed below agrees to accept the following emission limitations:

- 8 tons of volatile organic compounds (VOC) per year
- 10 tons of nitrogen oxides (NOx) per year
- 20 tons of carbon monoxide (CO) per year
- 8 tons of sulfur oxides (SOx) per year
- 3 tons of particulate matter less than 10 microns (PM10) per year
- 1 ton of an individual hazardous air pollutant (HAP) per year
- 2.5 tons of all HAPs combined per year

By accepting these limitations, the facility may be eligible for exemption from City of Philadelphia operating permit requirements. The facility will continue to maintain its air pollution license(s) and pay annual licensing fees.

Facility Information:

Facility Name: _____

Facility Address: _____

Contact: _____ Telephone Number: _____

Certification

This certification must be signed by a responsible official. See 25 PA Code Chapter 121 for the definition of responsible official.

I certify that the above named facility will comply with the emission limitations set forth in this document.

(Signed): _____

Date: _____

Name (Typed): _____

Title: _____

AMS Approval

**Instructions for
Request for Exemption from City of Philadelphia Operating Permit
Requirements Form**

This form may be used by a facility to request an exemption from the City of Philadelphia operating permit requirements. To be eligible for an exemption, the facility must agree to accept the facility-wide emission limitations listed at the top of the form. In addition, the following facilities are **not** eligible for an exemption:

1. Facilities with **potential** emissions greater than or equal to the following:
 - 25 tons of volatile organic compounds (VOC) per year
 - 25 tons of nitrogen oxides (NO_x) per year
 - 100 tons of carbon monoxide (CO) per year
 - 100 tons of sulfur oxides (SO_x) per year
 - 100 tons of particulate matter less than 10 microns (PM₁₀) per year
 - 10 tons of an individual hazardous air pollutant (HAP) per year
 - 25 tons of combined hazardous air pollutants (HAP) per year.
2. Facilities that are applicable to a Standard of Performance for New Stationary Sources (NSPS) regulation listed in 40 CFR Part 60.
3. Facilities that are applicable to a Maximum Achievable Control Technology (MACT) regulation listed in 40 CFR Part 63.

In addition, Air Management Services may decide not to grant an exemption to a facility if it believes an operating permit is necessary to properly monitor compliance for the facility.

All submissions and correspondence should be directed to:
