

NOTICE

EFFECTIVE MAY 1, 2018, ALL APPLICATIONS FOR WOOD FRAMING SYSTEMS MUST INCLUDE A SEPARATE WALL BRACING PLAN.

Required Plan Information:

- Size and location of braced wall panels;
- The width and height of exterior walls and openings;
- Wall construction details;
- Connection details;
- Demonstration of continuous load path to the foundation.

Additional Requirements:

- An application complying with prescriptive requirements of the IRC or IBC must identify method on the wall bracing plan.
- An application incorporating an approved pre-engineered system must include manufacturer's installation instructions.
- An engineered design must be accompanied by structural calculations bearing the engineer's seal and signature.
