HVAC EQUIPMENT DESIGN FORM

Use this checklist for one- and two-family dwellings and townhouses of any height. Groups R-2, R-3, and R-4 three stories or less in height above grade plane use the Group R version.

House Address: ___________________________________ Permit #: __________________ Date: ____________

Permit holder: ___________________________________________ Phone: __________________

Homes pursuing ENERGY STAR certification may attach a completed ENERGY STAR National HVAC Design Report in lieu of completing the remainder of this form. Otherwise, complete the following information.

Mandatory Items:

☐ R403.1.1 Thermostats will be programmable

☐ R403.3.1 Ducts in unconditioned spaces ≥ 3” diameter will be insulated to ≥ R-8 in attics and ≥ R-6 elsewhere

☐ R403.3.1 Ducts in unconditioned spaces < 3” diameter will be insulated to ≥ R-6 in attics and ≥ R-4.2 elsewhere

☐ R403.2.2.1 Air handler will have manufacturer’s designation of ≤ 2% air leakage when tested per ASHRAE 193

☐ R403.3.3 The Duct and Envelope Testing form will be submitted to the inspector

☐ R403.4 HVAC pipe insulation is R-3 minimum (e.g. hydronic systems, refrigerant lines) and outdoor insulation is protected

☐ R403.7 Manual J report, including heating and cooling design loads, will be provided to the inspector

☐ R403.7 Heating and cooling equipment will be selected in accordance with Manual S, based on loads calculated in accordance with Manual J

Equipment Sizing and Selection:

Design loads:

Design cooling load _____________ (Btu/h)   Design heating load: _____________ (Btu/h)

☐ Manual S. Specified cooling equipment capacity will be ≤ 1.15 times the design load or the next larger nominal size, whichever is greater. (Exception: Heat pumps may exceed the design load by 1.25 times or the next nominal size.)

☐ Manual S. Specified heating equipment capacity will be ≤ 1.40 times the design load or the next larger nominal size, whichever is greater

☐ R303.4 Whole-house mechanical ventilation worksheet has been completed (see reverse)

WHOLE-HOUSE MECHANICAL VENTILATION DESIGN WORKSHEET

1. Fill in the conditioned floor area and number of bedrooms for the dwelling:

   Conditioned Floor Area = __________ ft²
   Number of bedrooms = ________

2. Circle the required airflow value on the table below:

   IRC Table M1507.3.3(1)
   Continuous Whole-House Mechanical Ventilation System Airflow Rate Requirements

<table>
<thead>
<tr>
<th>Dwelling Unit Floor Area (square feet)</th>
<th>Number of Bedrooms</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0-1</td>
</tr>
<tr>
<td>&lt; 1,500</td>
<td>30</td>
</tr>
<tr>

<tr>
<td>Factor</td>
<td>4.0</td>
<td>3.0</td>
<td>2.0</td>
<td>1.5</td>
<td>1.3</td>
</tr>
</tbody>
</table>

3. Will the fan operate continuously or intermittently?  ☐ Continuous  ☐ Intermittent

4. If the fan will be operated intermittently, multiply the airflow value from Table M1507.3.3 (above) by the appropriate value in Table M1507.3.3(2) (below). Note: the fan must operate on a pre-set schedule.

5. Enter the required airflow = __________ CFM

   ☐ The fan’s rated airflow rate will meet or exceed the value in Item 5
   ☐ The fan’s rated efficacy will meet or exceed the appropriate value below:

   • Bathroom/utility room fans 90 cfm or greater, in-line fans, and range hoods: 2.8 cfm/watt
   • Bathroom/utility room fans 10 cfm or greater and less than 90 cfm: 1.4 cfm/watt
   • HRV or ERV fans: 1.2 cfm/watt
