To Whom it may concern, I'm tired of all governments increases. You need to look at all the waste, But we know it's easier to just raise rates. I run a refrigeration business, If I need more money, I first have to look at waste or inefficiencies. Also if I raise may rate too much I could loose customers. As a utility, you have NO competition, we have no were else to go. A 10 to 15% increase is way too much.. The water department needs to get it together!

Sincerely,  
Jim Czerniak
