I've been pondering whether or not to write this email since my house will be going on the market by late Spring and my new abode will not be in the City. I do not have a City water connection. I have a well. I do not have a sewer connection, my waste goes into a cesspool which I have the responsibility of emptying when needed. Yet I get a bill; right now it's \$14.15 per month, because rain falls on my driveway. Are you planning to raise that too? Because if you are, it stinks to all hell. How can you justify this cost? And don't tell me it's because you sit at the bottom of County Line Road and have the water empty into a bucket... that's laughable. Most of my stormwater goes onto Trevoise Road, and not into the City. I don't get it. Is it just because I have a 'city' address that you have burdened me with this cost every month for the past two years? I'd like an explanation, please.
