Subject: Water rate

I believe that any rate increase would be a burden on the citizens of Philadelphia. It seems that every time I turn around, there are rate increases. More of my hard earn money is going out of my pocket into other things. The thing is, and I believe the government and it agencies do not realize that our salaries do not go up. They stay the same . How can anyone live the American Dream if every time anyone gets a dime, we need to shell out more money. I believe there will be one day when our government taxes us and rate increase us out, meaning force us to live other places. Yes, the other places have taxes also, but the dream is more clearer. I'm 100 percent against any more burden on us, the customers. Without us, there would be no companies.
