I really disagree with the water department on the height of the bill for water the way to save money is to get rid of the inconsistency of the cruise and set out there be sleeping all night on the taxpayers dollars always trying to raise the taxes or heights on water and other resources that we use I totally definitely disagree with the 12% height between 9 and 2017 it's a way to consolidate the water and the gas meters so you will have to do it individually this cost taxpayers dollars w have to find a way to put back what you already use so that means you have to raise taxes somewhere else which is wrong that we have to pay higher tax rates so I totally disagree with the price rates I told you told me Express that I disagree with the price right I will attend a couple of the formal meetings they were kind of progress is being made because we need to do something everything always consists of the price hike with both of us to the consumers have to pay I really disagree strongly 12% of just too much we can't afford the love you keep praying higher tax.
