I am strongly opposed to the proposed increase of 12% over two years for one simple reason: your rates are already quite high.

I pay nearly \$34 per month for water and I spend only a few days a month in my home. My usage is quite low, but because of fixed fees for storm water runoff and other fees I pay a lot for a service I barely use.

I would like to understand why such a large increase is being sought and how it is justified.

We pay a lot for everything in Philadelphia, and our gas utility is also a monopoly managed by the city. We have not choices.

I urge you to rescind this increase or scale it back to 2% annually.
