

PHILADELPHIA WATER DEPARTMENT
STATEMENT NO. 6

BEFORE THE
PHILADELPHIA WATER, SEWER AND STORM WATER RATE BOARD

In the Matter of the Philadelphia Water Department's Proposed Change in Water, Wastewater and Stormwater Rates and Related Charges	Fiscal Years 2021 - 2022
--	--------------------------

Direct Testimony

of

Raftelis Financial Consultants, Inc.

on behalf of

The Philadelphia Water Department

Dated: 11 February 2020

TABLE OF CONTENTS

I.	INTRODUCTION AND QUALIFICATIONS	3
II.	TIERED ASSISTANCE PROGRAM (TAP)	7
III.	COST OF SERVICE REPORTING	10

I. INTRODUCTION AND QUALIFICATIONS

Q1. PLEASE STATE YOUR NAMES AND BUSINESS AFFILIATION.

A1. Our names are Jon Pilkenton Davis, Henrietta Locklear, and Jennifer (Fitts) Tavantzis. We are employed by Raftelis Financial Consultants. We will be presenting our testimony as a panel.

Q2. PLEASE DESCRIBE THE FIRM, RAFTELIS FINANCIAL CONSULTANTS.

A2. Raftelis Financial Consultants (RFC) is a subchapter S Corporation incorporated in the State of North Carolina. RFC was established in 1993 by George A. Raftelis to provide national financial and management consulting services of the highest quality to public and private sector clients, but primarily in the municipal water, sewer, and storm water utility sectors. Since that time RFC has grown to be one of the largest such firm in the nation employing over 100 financial and management consulting professionals and assisting over 500 utilities. RFC is a registered municipal advisor with the Municipal Securities Rulemaking Board and the Securities and Exchange Commission.

Q3. WHAT IS THE NATURE OF YOUR RESPECTIVE PROJECT RESPONSIBILITIES?

A3. Mr. Davis has been with RFC for over nineteen years. He currently serves as Executive Vice President with the firm managing and directing client engagements. Ms. Locklear has been with RFC for over eight years. She is Vice President with the firm, responsible for client management, project management and oversight of production of project deliverables and production of deliverables. Ms. Tavantzis has been with RFC for over

1 eight years. She currently serves as a Manager, coordinating project elements and
2 performing data analysis.

3
4 **Q4. PLEASE SUMMARIZE YOUR RESPECTIVE BACKGROUNDS AND WORK**
5 **EXPERIENCE.**

6 A4. Mr. Davis is a graduate of Wake Forest University with a Bachelor of Science Degree in
7 Physics and Mathematics. He is also a graduate of the McColl School of Business at
8 Queens University with a Master of Business Administration Degree. In 1993, he joined
9 Lance, Incorporated based in Charlotte, North Carolina. While at Lance, he served as an
10 Environmental Engineer, a Capital Projects Manager, and a Financial Analyst. In 2000,
11 he joined RFC where he has been involved in numerous financial and management
12 consulting engagements for water, sewer, and storm water utilities. He has served in
13 increasing levels of responsibility within the firm moving from Consultant to Manager to
14 his current position of Vice President. He has assisted many water, sewer, and storm
15 water clients on financial and management issues in addition to Philadelphia Water
16 Department (PWD or Department). His clients have included the City of Baltimore
17 (MD), DC Water, Washington Suburban Sanitary Commission (MD), the City of
18 Richmond (VA), the City of Reading (PA), Columbus (GA) Water Works, Charlotte
19 Water (NC), the City of Virginia Beach (VA), the City of Buffalo (NY), Erie County
20 (NY) Sewer Districts, the City of San Diego (CA), the City of Phoenix (AZ), the City and
21 County of Honolulu (HI), and others.

22
23 Mr. Davis is a member of the Water Environment Federation where he serves on the
24 Utility Management Committee as Chair of the Finance and Administration
25 Subcommittee. He also serves as utility management liaison to the Technical Practices

1 Committee. He is the past-chair of the Utility Management Conference co-sponsored by
2 the Water Environment Federation and American Water Works Association. He is also a
3 member of the American Water Works Association.
4

5 In 2014, Mr. Davis co-authored a chapter in Water and Wastewater Finance and Pricing,
6 Fourth Edition (Raftelis) titled “Financial Capability and Affordability”. He also co-
7 authored an article titled “Is our Water Affordable” for the July 2014 edition of the
8 American Water Works Association Journal.
9

10 Mr. Davis served as Chair for 2018 update of the Water Environment Federation’s
11 Manual of Practice No.27: Financing and Charges for Wastewater Systems.
12

13 Schedule RFC-1 provides additional detail as to Mr. Davis’ relevant work experience.
14

15 Ms. Locklear is a graduate of the University of North Carolina at Chapel Hill with a
16 Bachelor of Arts in Political Science and a Masters of Public Administration.
17

18 In 2004, Ms. Locklear joined amec (now Woods Group), in its Nashville, TN office and
19 in 2006 transferred to its Raleigh, NC office. While at amec, she served in positions of
20 increasing responsibility from public relations coordinator up to project manager. She
21 was involved in a wide variety of water resources projects including water quality permit
22 compliance, regulations development, floodplain mapping and stormwater finance. As a
23 project manager and supervisor, she managed multi-million dollar projects and a team of
24 stormwater finance and Geographic Information System (GIS) specialists.
25

1 In 2011, Ms. Locklear joined RFC. At RFC, she has been involved in a variety of
2 financial and management consulting engagements for water, sewer, and storm water
3 utilities. She has served in increasing levels of responsibility within the firm moving from
4 senior consultant to manager and now, in her present position as a Vice President.

5
6 Schedule RFC-2 provides additional detail as to Ms. Locklear's relevant work
7 experience.

8
9 Ms. Tavantzis is a graduate of University of Richmond with a Bachelor of Arts in
10 Environmental Studies and Geography. She is also a graduate of Duke University's
11 Nicholas School of the Environment, where she studied Water and Air Resources and
12 earned a Masters in Environmental Management. From 2011 to 2012, she worked with
13 the Colorado Department of Public Health and Environment's Safe Drinking Water
14 Program. In that capacity, she assisted small water system operators maintain compliance
15 with State monitoring and reporting standards.

16
17 In 2012, Ms. Tavantzis joined RFC. During her time at RFC, she's been engaged in
18 numerous stormwater utility implementations and water, sewer, and stormwater
19 management consulting projects. In addition to working with the Philadelphia Water
20 Department and Water Revenue Bureau on the Management Audit, she has worked with
21 clients across the Commonwealth of Pennsylvania and throughout the country. Ms.
22 Tavantzis has managed or has been involved in projects such as the City of Richmond
23 (VA), the Borough of Carlisle (PA), Lower Paxton Township (PA), the City of Baltimore
24 (MD), the City of Durham (NC), Granville County (NC), City of Raleigh (NC), Beaufort
25

County (SC), City of Jackson (MS), City of Cleveland (OH), City of Dallas (TX),
Pinellas County (FL), and New Orleans (LA).

Ms. Tavantzis is a member of the Water Environment Federation and in 2017, she
contributed to WEF's Manual of Practice No.27: Financing and Charges for Wastewater
Systems.

Schedule RFC-3 provides additional detail as to Ms. Tavantzis' relevant work
experience.

Q5. WHAT IS THE PURPOSE OF YOUR TESTIMONY TODAY?

A5. We will provide background on the City's Tiered Assistance Program (TAP) and recent
program enhancements. We will also describe reporting RFC performs in support of cost
of service development for the Rate Case.

II. TIERED ASSISTANCE PROGRAM (TAP)

**Q6. WHAT REPORTS HAS THE CITY DEVELOPED TO SUPPORT THE
ADMINISTRATION OF TAP?**

A6. The City has developed reports to support the operational and fiscal management of TAP.

The following interrelated types of reports support TAP performance tracking:

- Daily and weekly customer assistance application processing reports
- Monthly program statistics
- Periodic cost of program reporting
- Annual City Council-required reports

- In addition, other ad hoc and periodic reports to support management of TAP have been requested and developed.

The City is using detailed data from the City's workflow and reporting software for the customer assistance program unit, CAMP, and detailed billing and cost data from the City's water billing system, Basis2. CAMP communicates with Basis2 so that reporting from CAMP can draw from both systems.

Some of the data that the City are tracking include:

- Applications requested, by method requested
- Applications submitted, by method submitted
- Applications by status change
- Customers by program enrolled
- TAP participation levels
- TAP discount amounts
- TAP bill payments

**Q7. WHAT ENHANCEMENTS HAVE BEEN MADE TO DATA REPORTING
RELATED TO THE ADMINISTRATION OF TAP?**

A7. Since the 2018 Rate Case, new reports have focused on quality assurance measures meant to ensure that the two pieces of software are interacting as expected, notifying WRB when customer communication is necessary, and tracking key metrics related to TAP participation, bills, discounts, and payments.

Q8. WILL THIS REPORTING BE MADE AVAILABLE TO CITY COUNCIL?

A8. Under Philadelphia Code Section 19-1605(7), the Revenue Department is required to submit, by March 31st of each year, a written report to the Mayor with timely copies furnished to the President and Chief Clerk of Council regarding TAP related activities undertaken during the previous calendar year. Philadelphia Code Section 19-1605(7) states:

(b) Each such report shall include the following information for the twelve-month period covered:

(.1) how many applicants were enrolled in IWRAP and a breakdown of such enrollments by income level, and the gross amount of arrears calculated;

(.2) how many applicants were not enrolled in IWRAP and a breakdown of the reasons for the same (e.g., lack of residency, failure of customer to follow up, and so on);

(.3) the total number of non-IWRAP payment agreements and a breakdown of such payment agreements by type, term, and amount covered, which amount shall be further broken down into principal, interest, penalties, and other fees or costs; and

(.4) the total number of IWRAP customers who defaulted during the applicable period and the reason(s) (e.g., non-payment, failure to recertify eligibility) for the default.

The Department submitted a report for 2016 calendar year, which provided the information in subsection 3 above, since the program was still under development in 2016. The Department submitted reports for 2017 and 2018 calendar years that provides all requested information and covers TAP metrics between July 1 and December 31 and covers non-TAP payment agreements for the entire calendar year.

III. COST OF SERVICE REPORTING

**Q9. WHAT ADDITIONAL REPORTING HAVE YOU PROVIDED TO SUPPORT
COST OF SERVICE DEVELOPMENT FOR THIS RATE CASE?**

A9. Three primary reports were developed for use in the cost of service study related to: 1. Service Usage and Billing; 2. Water Usage and Billing; 3. Payment Patterns.

The Service Usage and Billing Report The first report details service usage and billings across the service area in aggregate by customer type, service type, and meter size. This report provides historical information on water, wastewater, and stormwater charges and usage at varying levels of detail for FY2012-FY2019. It comprises three tables, which provide bills, accounts, consumption amounts and usage charges by service type and customer category; bills, accounts, service charges by service type and meter size; and bills, accounts, and stormwater usage by service type and customer category. Accounts included in this report have a unique customer at a location (installation) combination, an account, with a “bill” type transaction of interest (usage, service, or stormwater) in a certain month. The bill transaction is the indicator of activity for that account (customer + installation combination). The report provides one field for the total of all accounts of interest for the year as well as the total of all accounts of interest for the year divided by 12 months (the “average” for the year). The Service Usage and Billing Report is included as Schedule RFC-4.

The Water Usage and Billing Report tallies the number of bills, volume of water usage, and total water charges within each tier of the current water quantity charge rate structure by Customer Category. The report includes only a single fiscal year, FY2019, and is only

1 based on data stored in Basis2 as of the June 30th extract (that is, without the use of
2 revenue reporting extracts containing historical information on customer types). The
3 Water Usage and Billing Report is included as Schedule RFC-5.
4

5 The Payment Patterns Report summarizes billings for each fiscal year, and payments
6 against those billings in each of three timeframes. The report includes a summary for
7 each fiscal year, FY2012 through FY2019. In this report, billings are defined as service
8 and usage charges, with creation dates during the fiscal year of interest. Billings do
9 include all City accounts except those designated as PWD accounts; they include only
10 retail customers, excluding any wholesale customers. Total billings are split between
11 Non-Stormwater Only (Non-SWO) and Stormwater Only (SWO) accounts based on the
12 account's installation designation. Payments for accounts other than City accounts are
13 defined as receipt or transfer credits allocated to billings. Payments are reported only
14 when they link to specific bill transactions reported for the fiscal year in question.
15 Payments in the 'Billing Year' are those that were received by the end of the fiscal year
16 in which they were billed. Payments in 'Billing year +1' are those that were received
17 during the subsequent fiscal year. Payments in 'Billing year +2 and beyond' are those
18 that were received any time after the subsequent fiscal year.
19

20 City accounts are billed the same rates and charges as all other Water Department
21 customers. Since the Water Department rates and charges do not maintain a separate rate
22 schedule for City accounts and City accounts are billed the same as retail customers,
23 collection factors for the cost of service study were developed for: Non-Stormwater Only
24 and Stormwater Only accounts. City accounts (other than PWD accounts) categories have
25

1 a 100% collection rate in the 'Billing Year'. The Payment Patterns Report is included as
2 Schedule RFC-6.

3
4 RFC also reports on monthly consumption for residential customer accounts and small
5 commercial accounts to determine the 'typical' consumption level. PWD provides
6 general billing information to its customers using the 'typical' bill as the basis for
7 communication. Schedule RFC-7 is the Typical Residential Customer Consumption
8 Memorandum. Schedule RFC-8 is the Typical Small Commercial Consumption
9 Memorandum.

10
11 **Q10. COULD YOU DESCRIBE IMPORTANT DIFFERENCES BETWEEN THE WAY**
12 **THAT THE DIFFERENT REPORTS WERE DERIVED AND THE REASONS**
13 **WHY THEY WERE DERIVED THIS WAY?**

14 A10. Depending upon the stated requirement of the report, the contents and constraints were
15 developed based upon different tables within the basis2 database structure. For example,
16 water consumption information was only available in the "debit lines" table whereas
17 information on whether a transaction had later been reversed was only available in the
18 "transactions" table. Because certain tables only had data relating to one theme (i.e. one
19 table for billings, one table for payments), each report had to be coded to reference and
20 limit data based upon the stated need. Two of the three reports were developed to
21 reference historical extract information on customer types and service types to attempt to
22 access the clearest picture of those data attributes back in time. RFC endeavored to use
23 the same bounding conditions in all reports where possible so that revenue and usage
24 information would align. Alignment and reconciliation of usage and billing data were
25

1 performed between the reports and satisfactory results were achieved as measured by
2 B&V, PWD staff, and RFC.
3

4 **Q11. HAVE YOU DERIVED A LOW-INCOME COLLECTION FACTOR?**

5 A11. Yes. RFC has developed a report that calculates collection rates for assistance program
6 participants, called Low Income Billing & Payments. WRB does not have income
7 information on all customers, so a system-wide low-income collection factor has not been
8 developed. The Low Income Billing and Payments Report is included as Schedule RFC-
9 9.
10

11 **Q12. HOW DO YOU COLLECT INFORMATION ON TAP CUSTOMER ARREARS?**

12 A12. When an applicant is enrolled in TAP, any water debt on that applicant's account is
13 assigned to one of two debt collection records: a TAPHLD record for principal charges,
14 an TAPPEN record for penalty charges. The debt collection records remain part of the
15 customer's balance, but are not enforced upon. At the time of enrollment and any point
16 afterward, the balance of those debt collection records can be determined through
17 reporting. After TAP enrollment, new charges do not get added to the debt collection
18 records; they are treated as an enforceable part of the customer's balance. A customer's
19 TAP discount is immediately written off and does not get added to a debt collection
20 record or the customers overall balance.
21

22 **Q13. WHAT ARE THE TOTAL ARREARS HELD BY TAP CUSTOMERS?**

23 A13. As of the end of FY2019, TAP customers had \$1,586,448.53 in TAP billings that remain
24 unpaid that originated while customers were participating in TAP (that is, unpaid TAP
25 bills). These customers had \$41,790,454.77 of pre-program arrears in TAPHLD debt

1 collection records, which represent billings that remain unpaid from before customers
2 were participating in TAP, and are protected from enforcement actions (collections,
3 shutoff, civil collection actions and Sheriff Sales). TAP customers also had
4 \$6,592,739.81 in penalties, associated with prior unpaid charges, that remain unpaid from
5 before customers were participating in TAP, and that are now in a TAPPEN debt
6 collection record, where such amounts are not subject to enforcement actions
7 (collections, shutoff, civil collection actions and Sheriff Sales). Penalties reported here
8 have not yet been forgiven as of the end of FY2019, but they may be in the future. TAP
9 customer are eligible to have penalties forgiven after 24 full TAP payments. TAP account
10 debt totals \$49,969,643.11.

11
12 **Q14. HOW DO TAP CUSTOMER ARREARS COMPARE TO ALL CUSTOMERS?**

13 A14. All residential customers, including TAP customers, have aging debt totaling
14 \$174,731,132.95 as of the end of FY2019. TAP account debt, in the form of unpaid TAP
15 bills and debt protected in TAPHLD/TAPPEN records accounts for approximately 29%
16 of the overall residential debt.

17
18 **Q15. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

19 A15. Yes.

25

Jon Davis

PROJECT DIRECTOR
Executive Vice President

PROFILE

Jon joined Raftelis in 2000 and currently serves the firm as a Vice President. Jon has extensive experience in financial forecasting and modeling and has led projects to apply advanced risk analysis techniques to rate and financial planning studies for the water and wastewater industry. Jon is an active member of the Water Environment Federation (WEF) Utility Management Committee where he chairs the subcommittee on Finance and Administration. He also serves on the WEF Technical Practices Committee (WEFTEC) and the WEFTEC Planning Committee. Jon has presented at many industry conferences, and also co-authored a chapter entitled, "Financial Capability and Affordability," for the Fourth Edition of the industry guidebook, Water and Wastewater Finance and Pricing: The Changing Landscape. Prior to joining Raftelis, Jon worked in water resource recovery facility management and capital projects engineering.

RELEVANT PROJECT EXPERIENCE

Philadelphia Water Department (PA)

Jon is serving as project manager on a long-term contract to provide financial and management consulting services for the Philadelphia Water Department (PWD). The services involve debt issuance support, financial forecasting, service affordability review, and strategic planning assistance. At present under the agreement, Raftelis is performing a bond feasibility study and consulting engineers' report for inclusion in PWD's Official Statement for a 2016 planned bond issuance. The bond feasibility study provides a forecast of revenues and expenditures for the utility to assure bondholders that PWD will be able to repay bonds and meet debt covenants.

As part of the same engagement, Raftelis is identifying and evaluating affordability programs including customer assistance and rate structure alternatives. The affordability program development is driven by a City Council mandate to overhaul the existing customer assistance programs. To date, Raftelis has developed program structure and administration options, modeled revenue impacts of a variety of options (including ones proposed by Council and outside groups), and participated in discussions both on structure and administration leading to the implementation of a final program.

In addition, Jon served as project manager for a management audit of customer service functions for PWD and the Water Revenue Bureau (WRB).

DC Water (DC)

Jon currently serves as project manager for an ongoing engagement with DC Water. Raftelis is working under a long-term contract to provide financial planning and rate consulting services. As the first task order under the contract, Raftelis performed the 2009 cost-of-service study (COS study). The COS study included four major project deliverables: assure the sufficiency of projected

Specialties

-] Utility cost-of-service & rate structure studies
-] Development impact fee studies
-] Affordability program development
-] Long-range financial planning & feasibility studies
-] Cost analysis & cost allocation

Professional History

-] Raftelis: Executive Vice President (2019-present); Vice President (2013-2018); Senior Manager (2009-2012); Manager (2005-2009); Senior Consultant (2000-2004)
-] Lance, Incorporated: Director of Energy & Environment, Projects Manager, Financial Analyst (1992-2000)

Education

-] Master of Business Administration - Queens College (1998)
-] Bachelor of Science, Physics & Mathematics - Wake Forest University (1990)

Certifications

-] Series 50 Municipal Advisor Representative

Professional Memberships

-] AWWA: Virginia Section; Chesapeake Section; Pennsylvania Section; North Carolina Section
-] WEF: Utility Management Committee; Finance & Administration Subcommittee Chair; WEFTEC Conference Planning Committee; Utility Management Conference Planning Committee; Technical Practices Committee

revenue to cover projected expenditures; calculate cost-of-service-based rates and compare them to projected rates; review miscellaneous fees and charges; and, recommend rate structure alternatives that enhance priority pricing objectives of DC Water. Raftelis worked closely with DC Water staff over a compressed project timeframe beginning in July, 2009. Results of the COS study, along with a comprehensive report and revenue sufficiency/cost-of-service model, were presented to the Retail Rates Committee of the Board on September 24, 2009. Raftelis will continue to develop rate structure options based on the recommendations in the study.

Columbus Water Works (GA)

Jon has served as project manager on a multi-phase project with Columbus Water Works (CWW) involving a financial management systems evaluation, cost-of-service analysis, block rate design, contract rate analysis, and financial reporting system review. The project goal was development and implementation of equitable yet understandable cost-based rate structures for both inside city and contract customers. The task was complicated by the recent departure of several large contract and wholesale customers and major looming capital needs. The study used a 5- to 10-year planning horizon that incorporated long-term capital planning needs, debt funding assumptions, operating cost projections, and demand projections. The Water Works Board voted on and agreed to the five-year program as recommended by Raftelis and CWW staff.

City of Baltimore (MD)

Jon serves as project manager on a multi-year cost-of-service, rate, and financial consulting contract for the City of Baltimore (City). As part of the contract, Raftelis is performing cost-of-service and rate design studies for the water and wastewater utilities. The contract also calls for assistance with long-term fiscal planning and development of financial plans for utility capital programs. Since the City provides wholesale and retail utility service for surrounding counties, the engagement includes inter-jurisdictional contract negotiation support and rate setting. Jon is responsible for project administrative functions such as invoicing and sub-consultant coordination over the term of the engagement.

Washington Suburban Sanitary Commission (MD)

Jon served as project manager on an engagement with Washington Suburban Sanitary Commission (WSSC) in Laurel, Maryland. WSSC is looking at alternatives to fund infrastructure renewal and AMR/AMI. The Raftelis Team is identifying and evaluating revenue enhancement opportunities to help fund approximately \$2.1 billion in incremental capital projects over the next 10 years. As part of our assistance, the Raftelis Team is helping to build the business case for monthly customer billing facilitated by AMR/AMI. WSSC has looked into automated meter reading for at least 12 years but has run into challenges with cost justification; their system contains over 440,000 customer accounts and almost 1,000 square miles. The Raftelis Team, led by Jon, will help to justify the investment in AMR/AMI through placing a value on its intangible benefits: more frequent pricing communication with customers, reduced delinquency, and reduced unaccounted for water.

City of San Diego Metro Wastewater Department (CA)

Jon served as lead consultant for a sewer cost-of-service and rate design study for the City of San Diego (City) Metro Wastewater Department. The study was conducted with extensive stakeholder group involvement and included a comprehensive review of the City's revenue requirements and allocation methodology, review of the City's user classification, an analysis of cost-of-service and rate design for City users. Rate design included evaluation of rate structure alternatives with emphasis on incorporating a uniform monthly base fee in conjunction with volume rates. The study also included a review of the City's capacity charges.

Charlotte-Mecklenburg Utilities (NC)

Jon has assisted on several financial services engagements for Charlotte-Mecklenburg Utilities (Utilities). Originally, Raftelis assisted Utilities in developing a water financial planning and rate model and related user manual. The rate model has been used to update rates and assist with Utilities' financial planning. Since the original model development, Raftelis has provided assistance in updating and refining the rate model. In addition, Jon and Raftelis have provided assistance in conservation-based rate development, industrial waste charge methodology, recycled water rate setting,

managed competition, and utility billing system cost allocation. Raftelis is currently assisting Utilities in developing stronger conservation-based water rates, while trying to maintain revenue sufficiency and stability.

Richmond Department Public Utilities (VA)

Jon currently serves as project director for our engagement with the Richmond Department Public Utilities (DPU). Raftelis is developing a financial planning model that incorporates all utility systems: water, wastewater, natural gas, street lighting and stormwater. DPU will use the model to set rates in addition to determining financial condition.

City of Virginia Beach Department of Public Utilities (VA)

Jon served as the project manager on an engagement looking into the feasibility of transitioning the Department of Public Utilities (DPU) from bi-monthly billing to monthly billing. DPU leadership was concerned that non-utility fees added to the utility bill would incite a public outcry for monthly billing. DPU wanted to be prepared to address this with two scenarios: an analysis of the most expedient method to enact monthly billing in the short term; and an analysis of the most efficient method to enact monthly billing in the long term. The Raftelis project team examined customer service functions related to monthly billing including meter reading, customer information systems, collections, and account management. These functions were split between the Operations Division, which handled field activities, and the Business Division, which handled customer account maintenance and call center operations. As a result of this project, DPU was able to identify both short-term and long-term approaches to meet its monthly billing transition.

York County (SC)

Jon served as project director on a wheeling rate study for York County, South Carolina (County). The County engaged Raftelis to calculate a wholesale or bulk rate for water purchased by the City of York and Tega Cay from the City of Rock Hill to be delivered through the County transmission system. The study involved developing a cost allocation methodology and associated rate for delivering water through the County system that considered alternative options for the assessment of capital costs.

City of Buffalo (NY)

Jon served as project manager for a comprehensive cost-of-service and rate study for the Buffalo Water Board (Board). The Board's primary pricing objectives were revenue sufficiency and equitable cost recovery from all customer classes. To achieve these objectives, Raftelis performed a cost-of-service study and developed two alternatives to the existing three-block, declining block rate structure. The results of the cost-of-service study indicated that the discount being realized by large volume customers was not cost justified and that only a minor portion of consumption was within the middle rate block. Raftelis recommended a phased approach to bringing the discount for consumption in the third rate block closer to a cost justified level and phasing out the middle rate block. Both the Board and the City's Common Council unanimously approved Raftelis' recommendations.

ADDITIONAL PROJECT EXPERIENCE

-] City of Arlington (TX) - Wholesale reclaimed water negotiation
-] City of Baltimore (MD) - Cost-of-service rate study, financial planning, interjurisdictional contract negotiation support, stormwater utility implementation, organizational optimization
-] City of Buffalo (NY) - Cost-of-service water rate study
-] Bureau of Governmental Research, New Orleans (LA) - Managed competition proposal evaluation study
-] Charlotte-Mecklenburg Utilities (NC) - Conservation pricing, reclaimed water program feasibility, billing and collections costs analysis and allocation study
-] Columbus Water Works (GA) - Cost-of-service rate study, financial planning, procurement feasibility
-] City of Corona (CA) - Wastewater rate study
-] DC Water (DC) - Economic development/service extension policy
-] Erie County (NY) - Regionalization feasibility study
-] City of Hendersonville (NC) - Water and sewer rate study

- J Town of Hillsborough (NC) - Development/impact fee study for water and wastewater, water and wastewater rate study
- J Gwinnett County (GA) - Development/impact fee study for water and wastewater
- J City and County of Honolulu (HI) - Department of environmental services - wastewater rate structure study
- J Town of Marana (AZ) - Water financial planning/rate study
- J Philadelphia Water Department (PA) - Wholesale rate arbitration, customer service strategic review
- J City of Phoenix (AZ) - Environmental fee study, privatization study
- J City of Portland (OR) - Water rate model design
- J City of Poway (CA) - Wastewater rate structure study
- J City of Richmond (VA) - Financial forecasting model
- J City of Rock Hill (SC) - Wholesale cost-of-service rate study, development/impact fee study
- J City of San Diego (CA) - Recycled water and wastewater rate study
- J City of Siler City (NC) - Debt feasibility study
- J Tarrant Regional Water District, Fort Worth (TX) - Financial feasibility study
- J United States Navy - Privatization procurement
- J City of Virginia Beach (VA) - Customer billing feasibility study
- J Washington Suburban Sanitary Commission (MD) – Infrastructure renewal funding, rate setting, development charges
- J York County (SC) - Countywide study for Evaluation of Water and sewer alternatives

PRESENTATIONS

- J “Fixing Affordability Challenges Requires a Full Toolbox,” Utility Management Conference, 2019

Henrietta Locklear MPA

PROJECT MANAGER
Vice President

PROFILE

Henrietta has 13 years of experience in local government finance and stormwater management. She specializes in working with local government staff, stakeholders, and elected officials to identify solutions and implement programs to meet environmental and public health challenges. Henrietta is experienced in governmental financial analysis and planning, particularly in stormwater utility implementation and rate studies. She is also experienced in all aspects of utility implementation, with particular focus on policy analysis and development, and data and billing system implementation. She has studied fee credit programs and served as project lead on credit program development for several large stormwater utilities. Henrietta has worked with more than 50 local governments on stormwater funding analyses, fee feasibility, or implementation projects and has served as project manager for more than 15 stormwater utility fee implementation projects. She was a member of the working group that developed the certification test for American Public Works Association's (APWA) Stormwater Manager Certification. She was also a reviewer for the Water Environment Federation's Special Publication entitled, *User-Fee-Funded Stormwater Programs*, 2nd Edition. In addition, Henrietta co-authored two chapters in the industry guidebook *Water and Wastewater Finance and Pricing: The Changing Landscape*, which are entitled, "Public Outreach and Gaining Stakeholder Commitment" and "Expanding Financing and Pricing Concepts into Stormwater." Henrietta has a wealth of experience with public input processes. On a variety of projects, she has developed and facilitated public stakeholder processes, outreach strategies, and education campaigns for programs ranging from stormwater utilities and National Pollutant Discharge Elimination System (NPDES) compliance efforts to brownfields, on-site wastewater, and hazard mitigation programs. Her strengths include: policy analysis and development; research methods, including survey development and administration; data analysis; local government finance; stakeholder facilitation; and strong written and oral communication skills. Recently, she has also focused on developing utility customer assistance and affordability programs.

RELEVANT PROJECT EXPERIENCE

Metropolitan St. Louis Sewer District (MO)

Raftelis serves as Metropolitan St. Louis Sewer District (MSD) financial and rate consultant under a multi-year engagement. Henrietta is assisting MSD with the development of its stormwater rate proposal for MSD's 2018 rate case, including the development of the proposed credits and incentives program.

City of Raleigh Public Utilities Department (NC)

In March 2012, the City of Raleigh (City) contracted Raftelis to conduct a comprehensive organizational analysis and development study for the City's Public Utility Department within a 20-week time frame. For several years, the

Specialties

-] Stormwater program planning & development
-] Stormwater finance & utility development
-] Stormwater rate structure analysis & cost allocation
-] Affordability program analysis, development & implementation
-] Billing & information systems
-] Meter technology modernization (AMI/AMR)
-] Public involvement & stakeholder facilitation
-] Management policy & practice
-] Technical writing
-] Business process development & improvement
-] Data & systems integration
-] Database architecture & analysis

Professional History

-] Raftelis: Vice President (2019-present); Senior Manager (2015-2018); Manager (2013-2014); Senior Consultant (2011-2012)
-] AMEC Morrisville, NC: Team Leader/Project manager (2009-2011)
-] AMEC Raleigh, NC: Supervisor/Project manager (2008-2009); project manager (2006-2008)
-] AMEC Nashville, TN: Public Affairs Coordinator (2004-2006)
-] Wake County Government: Planning Technician (2003-2004); Intern (2003)
-] School of Government, University of North Carolina at Chapel Hill: Research Assistant (2004)

Education

-] Master of Public Administration - University of North Carolina at Chapel Hill (2004); Deil S. Wright Award for Outstanding Capstone Paper
-] Bachelor of Arts in Political Science - University of North Carolina at Chapel Hill (2002); Phi Beta Kappa; Order of the Golden Fleece

Certifications

-] Series 50 Municipal Advisor Representative

Professional Memberships

-] WEF

City has been discussing whether to relocate its stormwater utility from the Public Works Department to the Public Utilities Department. The move could have far-reaching effects on the relationship between stormwater and transportation, the efficiency of planning, design and engineering activities, regulatory compliance, and customer service management. Henrietta is one of the project leads on the Raftelis team. With extensive knowledge of and experience in the field of surface water management, the Raftelis team was asked to compile, measure, and analyze the costs and benefits of relocating the utility. As this data would inevitably be presented in both qualitative and quantitative formats, Raftelis conducted both types of analysis to arrive at its recommendation. Finally, Raftelis has reported its findings to the leadership of Public Utilities, Public Works, and the City of Raleigh. In the past, Henrietta served as project manager for on-call stormwater services contract. In this position, she served as lead for tasks including a benchmarking study of the City's program.

Philadelphia Water Department (PA)

Henrietta manages several efforts for Raftelis' engagements with Philadelphia Water Department (City). These include the development of the City's affordability program and a management study of the utility's meter-to-cash operation and annual reporting efforts to support the department's financial planning and cost-of-service studies. For the management audit, she oversaw the review of customer service and billing processes as well as a detailed analysis of the utility's billing system. She is also assistant project manager for Raftelis' multi-year engagement with the Department to provide financial consulting services. Henrietta has led the development of the City's affordability program, the Tiered Assistance Program, which launched July 1, 2017.

City of Baltimore (MD)

Henrietta served as project lead for a complex and fast-paced project to implement a stormwater fee for the Bureau of Water and Wastewater with the City of Baltimore (City). She was the architect of the project approach covering all aspects of required elements for implementation and ensured the delivery of multiple key elements. One element was the credits program and Henrietta assisted staff with the credit program development including an innovative participation-based credit for residential customers. The City sent its first stormwater bills in October of 2013 and Henrietta has continued to assist the City with customer service, billing system and policy topics to the present.

City of Calgary (Canada)

Henrietta led a broad-based survey associated with the City of Calgary's (City) recent analysis of a potential stormwater rate structure change. Raftelis was engaged as a sub-contractor for the City's recent utility rate study and rate structure analysis. The peer survey and industry summary covered a range of practices around stormwater fees including rate bases, credits and incentives, implementation of green infrastructure programs, data sources, and billing methods. The report was used to inform the development of a plan for rate structure change in the City's next five-year planning cycle. Henrietta presented results to the steering committee.

Granville-Person Cooperative Stormwater Services (NC)

Henrietta served as project manager for implementation of an innovative multi-jurisdictional utility in a group of jurisdictions affected by nutrient-sensitive waters rules. The three municipalities and two counties that make up the collaborative group differ in population, population density, land use/land cover, and current and planned level of service provision. The project thus involved complex policy development around rate structure, organizational structure, and other issues.

In addition, Henrietta now serves as the Stormwater Utility Services Manager for the group of jurisdictions to assist with coordination and regulatory compliance. Here duties included assisting the local governments with compliance for the Falls Watershed nutrient management strategy rules. She has served as the manager since 2013.

City of Boulder (CO)

Henrietta was the lead for a stormwater rate structure analysis for the City of Boulder (City) as a part comprehensive water, wastewater and stormwater rate assessment and to develop rate alternatives for each utility. The study included a detailed review of policies and practices incorporated in separate utility rate models maintained and updated by the City

for validation and/or modification as well as a comprehensive review of improvements to the utility rate structures. The City's stormwater collection and drainage systems are faced with equitably recovering increased operating and capital requirements associated with increasing storm drainage service levels following the flooding experienced by the City in the fall of 2013. Alternatives included impervious area only and impervious area and gross area structure and the implementation of a credits program to incentivize green infrastructure practices. The team assessed how well City goals and customer concerns were addressed by the alternatives through detailed customer bill impact analysis. Throughout the project Raftelis has worked extensively with City staff to review and refine study findings and recommendations. With City staff, Henrietta presented interim study recommendations to the standing Water Resource Advisory Board (WRAB) to provide direction regarding policies, practices and adjustments to the utility rate structure for review and approval by City Council.

City of San Jose (CA)

Henrietta serves as project manager for a fast-paced project to assess the City of San Jose's (City) stormwater program funding needs, funding gap, and potential funding sources. The City is under a consent decree with the San Francisco Baykeeper, which in part, requires the City to identify and secure funding sources for capital improvements required under the agreement. Henrietta has over seen the data collection, financial plan development and funding gap determination as well as opinion research to determine citizens' knowledge and understanding of the stormwater system and needs and willingness to pay for service. The engagement is ongoing.

Adams County (CO)

Henrietta managed an engagement with Adams County (County) to complete a Stormwater Utility Credit study, of which the outcome was to develop guidelines, policies, and procedures for offering utility fee credits to customers in the Adams County Stormwater Utility. The team completed a preliminary review of the stormwater program and utility documentation, financial materials, billing data, and the Stormwater Management Task Force meeting materials and minutes. Following this review, Henrietta visited sites around the utility service area that were representative of existing stormwater management or special drainage conditions. Henrietta summary of these site visits and an overview of available credit types were presented to utility staff and the County board along with the preliminary Raftelis recommended program structure. Henrietta used program costs and other data to determine maximum available credits and estimate the revenue impacts of implementing the program. Raftelis recommended that the utility implement a limited credit program, focused primarily on incentivizing treatment practices that result in improved water quality or reduced peak flow or runoff volume. Recommendations were based on analyses of the utility's costs and a determination of which costs have the potential to be reduced through customers' stormwater treatment or activities, and which costs could not be further reduced through these means. Finally, Henrietta estimated the potential revenue impact of implementing the recommended credit program.

Pinellas County (FL)

Henrietta led the development of the business case for Advanced Metering Infrastructure (AMI), monthly billing, and rate structure changes. Pinellas County (County), located in the Tampa-St. Petersburg area of Florida, provides potable water, wastewater, and reclaimed water service throughout its utility service area. The County engaged Raftelis in January 2014 to conduct a comprehensive utility business and rate sustainability analysis to provide a comprehensive road map for the County utility over the next decade in terms of customer service, technology, rate structure, and sustainability. The business case initiatives include evaluation of the billing cycle (currently bi-monthly), the potential for automating the meter reading process, and other technology and process improvements. Another part of the project, focused on rate sustainability, included development of a comprehensive 10-year financial forecast and evaluation of existing rate structures for equity, revenue sufficiency, and long-term sustainability.

Based on the need for a comprehensive analysis of the factors involved in changing the utility's business model, Henrietta lead workshops to define over 80 cost variables involved in the transitions. The results of the workshop were rolled into a detailed, flexible model that allowed for a variety of scenarios (from conservative to not conservative) to be modeled for seven business case scenarios and the best, worst, and expected costs and benefits for each. The model provides a 20-year net present value to the utility for each case. Henrietta vetted the model with staff, employing collaborative work with

stakeholders throughout the business case development. The results were explicated in a detailed report in late 2014 and presented to the core group and the County management team. The report, including the long-term road map for utility enhancements and rate recommendations, was finalized in early 2015 and presented to the Board of County Commissioners.

County of San Diego (CA)

Henrietta served as project manager for a study of the County of San Diego's (County) funding strategies to meet new, stringent regulatory requirements for stormwater. The study includes analysis of an array of options including county-only and regional funding alternatives that would include the jurisdictions within the County, co-permittees under a single water quality permit. The study involves coordination with the co-permittees as well as extensive data analysis, development of a financial model and implementation plan for the recommended strategy.

City of Sacramento (CA)

Raftelis was engaged by the City of Sacramento (City) to develop rate structure alternatives for the City's water, wastewater, and stormwater drainage rate structures. Henrietta oversaw the development of the stormwater drainage rate structure alternatives and modeling, including more than five alternatives. She oversaw the development of the potential rates from each and for modeling the City's favored rate structure alternative. Raftelis' findings were compiled in a report, and Henrietta contributed to presentations to stakeholders and staff throughout the project on the storm drainage fee alternatives.

City of Richmond (VA)

Since 2007, Raftelis has been engaged by the City of Richmond (City) Department of Public Utilities (DPU) as its financial and rate consultant. Henrietta lead the review of a potential stormwater fee structure change under the City's consideration. Since the rate structure posed issues of public acceptance as proposed, Henrietta developed additional, more palatable alternatives for the City's consideration. The analysis involved a detailed impacts analysis for customers. Henrietta assisted with presentations to staff on the alternatives, the selected alternative and the potential rates for the current stormwater financial plan. Henrietta lead an assessment of reporting capabilities, gaps, and needs for DPU. The goal of the assessment and Raftelis recommendations is to enable staff to streamline reporting and facilitate strategic activities within the Department. Implementation of assessment results is ongoing, including assisting DPU with the development of its water loss program.

City of Charlotte (NC)

Raftelis' most recent engagement, with the City of Charlotte (City), has been to assess the City's program including comparing the program with those of other utilities nationwide. Henrietta lead the assessment, which included reviews of program policies and finance, including funding methodology. One focus of the assessment was on the City's Maintenance and Repair program which is the portion of the City's capital improvement program that resolves drainage complaints from citizens. The program has a large backlog of projects and the City sought to analyze the program and the best solution to resolve the backlog, including potential level of service, policy and funding changes. As a part of the study, Raftelis performed analysis of debt funding options over 10-year and 20-year planning horizons as one option to increase investment to meet capital needs. Raftelis provided the broad assessment of the program's health, identified chief challenges for the future and recommended strategies to meet those challenges. Raftelis provided presentations to Council and to the program's citizen stakeholder committee on the study and results.

Northeast Ohio Regional Sewer District (OH)

Henrietta assisted in the Data Track of the project to develop a user fee to support Northeast Ohio Regional Sewer District's (NEORS) stormwater management program. Once implemented, the stormwater management program will serve 61 municipalities and two counties that are part of NEORS's service area. She developed policy documentation for the utility's data management. Henrietta also assisted in a variety of tasks to support the development of a user fee to support the NEORS's stormwater management program. She has performed policy analysis and documentation and data analysis to support program implementation and billing and data development. She also supervised additional documentation and analysis and peer reviewed project deliverables. As project manager, Henrietta has overseen project

management for NEORSD, reviewing charges, invoicing, and subcontractor invoicing in compliance with NEORSD standard procedures. She managed both data development and data quality control tasks as supervisor of the data and policy analysts performing tasks such as parcel aggregation and database development.

Henrietta is currently serving as assistant project manager for the billing implementation phase of this project. In this capacity, she has led policy review and development and prepared and reviewed deliverables.

City of Dallas (TX)

Henrietta is serving as assistant project manager for the study and implementation of a stormwater rate structure change for the City of Dallas (City). The City implemented a stormwater fee in 1991 that generates about \$49 million annually. The rate structure change represents a significant effort on the part of the City to assure the financial stability of its Storm Drainage Fund, recover costs more equitably from its ratepayers, and to do both in a transparent fashion. If implemented, the updated rate structure embodies a considerable change, not only for ratepayers receiving changed bills, but also for the City's business processes for billing and account maintenance. Raftelis is tasked with determining the stormwater cost-of-service and developing the stormwater financial plan. Raftelis will also be updating available impervious area data and evaluating potential rate structures. We will be performing an account review and evaluating the impacts upon customers of a rate structure change. In addition we will evaluate the billing mechanism and perform account to parcel matching. Raftelis will assist the City with necessary rate ordinance changes and with public outreach around the rate structure changes. Raftelis will be assisted by subcontractors K Bealer, Pacheco Koch Consulting Engineers, and Ware and Associates.

Town of Kernersville (NC)

Henrietta served as project manager for the development of a strategic plan for the Town's stormwater program. The plan development involved a series of workshops with staff throughout the Town that touch the stormwater program and the development of a comprehensive plan to drive the program over the next five years. Her team is currently conducting a review of the Town's stormwater billing data and providing recommendations on bringing the data up to date. Previously, Henrietta led a project to review the Town's stormwater program. She conducted interviews of stormwater, public services, and Town administrative staff to document stormwater program details. She then analyzed the program for compliance with NPDES requirements and is in the process of compiling results. The project also involved developing a written procedure for the annual stormwater billing update for the fees, which are conveyed on Guilford and Forsyth Counties' tax bills.

City of Tacoma (WA)

Henrietta served as technical reviewer of the stormwater cost allocation study as part of a water, wastewater, and surface water rate study. In this role, she provided guidance on cost allocation methodology.

Town of Mooresville (NC)

Henrietta served as Project Lead for a feasibility study for the Town of Mooresville. Tasks included development of stormwater program existing and future costs, including staffing, hourly equipment costs, and capital program costs. She assisted with development of rate base estimate and fee estimations. She developed stakeholder process meeting materials and presentations, and led stakeholder meetings.

City of Charlotte and Mecklenburg County (NC)

Henrietta serves as project manager for strategic planning in support of business process improvements for all business processes that relate to stormwater utility billing, collections, database maintenance, and customer service. The outcomes from this project will support improvements in the connectivity between the third-party billing vendor and the stormwater utility and among the departments serving stormwater customers.

In addition, Henrietta served as project manager for the analysis of residential rate structures and crediting options for this well-established stormwater utility. She developed options and analyzed rate implications and pros and cons of various

options. She also presented initial options to the Stormwater Advisory Committee (SWAC), responded to comments, presented revised options to SWAC, and developed handout materials for SWAC and final report for staff.

Philadelphia Water Department (PA)

Henrietta served as project key lead for a study assessing potential changes to Philadelphia Water Department's (PWD) stormwater fee rate structure, credits regulations, and green infrastructure incentives. The project involved a detailed assessment of the Department's then current rate structure and program, a national credit and incentives study of comparable utilities, as well as an intensive stakeholder input process. Henrietta led the national credits study and coordinated the stakeholder process, including policy development and assessment. Henrietta also oversaw data analysis inputs into the stakeholder process.

Town of Butner (NC)

Henrietta served as project manager for a stormwater management program development project for the Town of Butner (Town). The Town is subject to both NPDES Phase II rules and the recently mandated Falls Lake Nutrient Management Strategy, which is considered to be one of the strictest set of nutrient management rules in North Carolina. Henrietta developed a five-year stormwater program plan, prepared the Town's NPDES Phase II permit application, and assisted in presentation of each of these to Town Council for approval. As part of the project, Henrietta developed planning level costs for the program and then assessed options for funding the program plan. The Town is currently weighing these options.

Tri-Cities (TN) (Bristol, Elizabethton, and Johnson City/East Tennessee State University)

Henrietta co-authored Notices of Intent (NOI) for renewal of MS4 NPDES Phase II permits for three northeast Tennessee cities, one of which was a co-permitted application with East Tennessee State University (ETSU). To complete the NOIs, Henrietta reviewed current programs with each of the permittees, consulted with the regulator on acceptable BMPs, developed best management practices and measurable goals for each permittee, and developed Public Information and Education plans (PIE plans) for each permittee. Henrietta also coordinated the co-permitting information and development of BMPs between Johnson City and ETSU, and coordinated the on-time submission of NOIs, submitting one on behalf of a permittee.

City of Wilmington (NC)

As project manager for a rate study of a 10-year old stormwater utility in eastern North Carolina, Henrietta developed a program cost-of-service for the seven-year analysis period as well as a rate model, and performed rate modeling. Issues considered in the cost-of-service projections and rate model included uncertainties in costs related to regulatory compliance and landfill fee. The utility funds an aggressive capital improvements program and all modeling was performed in compliance with the City of Wilmington's conservative cash management principals and with existing revenue bond covenants. Henrietta drafted the cost-of-service report and rate study report.

Lexington-Fayette Urban County Government (KY)

Henrietta was peer reviewer for the development of a user fee to support LFUCG's stormwater management program including review of policy documentation.

City of Tega Cay (SC)

Henrietta was project manager for development and implementation of the stormwater utility for the City of Tega Cay. In this role, she coordinated program review and finalization, crediting process, cost-of-service analysis, rate structure and rate study reports, rate ordinance and enterprise fund establishment, data development, and public relations assistance. She also served as client manager overseeing annual updates to the billing file for annual stormwater fee billing.

City of Aspen (CO)

Henrietta performed an analysis of current regulations and the degree to which development standards encourage green stormwater practices. In addition, she performed reviews of draft manual chapters.

City of Manchester (NH)

Henrietta was project manager for development and implementation of the stormwater utility for the City of Manchester. In this role, she was responsible for reviewing policy papers related to data issues, as well as ensuring timely deliverables and financial control of the project.

Wake County Department of Environmental Services (NC)

As project manager, Henrietta was responsible for a multi-faceted project to implement the recommendations of a countywide, multi-jurisdictional stakeholder group that recently completed its work. The project involved several disparate elements: facilitation of a stakeholder group tasked with developing a multi-jurisdictional post-construction ordinance, development of a risk-based methodology for erosion control enforcement, and an innovative pilot basin model that would help the Wake County Department of

Environmental Services test development scenarios. In this role, she oversaw the coordination and management of a stakeholder group; conducted research on risk factors for construction site erosion, channel protection methodologies, and other stormwater concerns; conducted interviews with local key stakeholders including stormwater staff, regulators, and members of the real estate community; and supervised modeling schedule, technical review and input, and publicization.

City of Jacksonville (NC)

As project manager for year-long management consulting project to assist the City Of Jacksonville (City) departments, Henrietta was responsible for stormwater compliance activities with organization, scheduling, tracking of activities, and reporting to enable the City to comply with its NPDES phase II permit. The project also included education sessions for Council, assistance with the creation of the City's stormwater ordinance to include construction and post-construction requirements, and coordination with the Unified Development Ordinance revisions process.

Southeast Metro Stormwater Authority (CO)

Henrietta served as project manager for a project to identify and describe potential credits and other fee-reducing actions that could be undertaken by the Southeast Metro Stormwater Authority (SEMSWA) stormwater utility in Englewood, CO. This analysis included a qualitative screening of the pros and cons of credits, an examination of the financial implications of adopting credits, a presentation to the Board of SEMSWA about the options, and development of credit application policies and procedures chosen by the Board. Henrietta managed the project, wrote the qualitative and quantitative analyses, and presented to the Board of SEMSWA.

Georgetown County (SC)

Henrietta was project manager for development and implementation of a stormwater utility for Georgetown County. In this role, she coordinated the program review and finalization, crediting process, cost-of-service analysis, rate structure and rate study reports, rate ordinance and enterprise fund establishment, data development, and public relations assistance. In addition, she ensured timely deliverables and financial control of the project and responded to requests for follow-up on work for MS4 program implementation and program management.

City of Cartersville (GA)

As project manager for the implementation phase of the City of Carteville's stormwater utility, Henrietta developed a public education and outreach campaign. Her responsibilities included writing public education and outreach plan and carrying out the plan. She created content and oversaw design of public education materials such as brochures, and drafted stakeholder policy papers and meeting presentations. Henrietta coordinated timely delivery of materials and meeting follow-up tasks.

City of Bettendorf (IA)

Henrietta was primary researcher and writer of technical, informational papers for use by staff to present to council on policies and designs of infiltration practices nationwide. Topics were: the use of infiltration practices to reduce required detention volume and utility credits for infiltration practices.

Metro Water Services of Nashville and Davidson County (TN)

As Task Manager on Phase II of revisions, Henrietta's responsibilities included drafting manual revision language and BMP designs and communicating with client and stakeholders on responses to revisions. Train staff and assist Metro Water Services of Nashville

and Davidson County with training for development community on new manual. She assisted with Phase I of revisions including facilitation of staff technical review and public stakeholder groups for Metro Water Services, Stormwater Division. Responsibilities included developing policy options for discussion, review, and modification or adoption by stakeholders groups; coordination of group meetings including distribution of meeting materials, facilitating communication among group members, and fielding and addressing group member concerns; addressing policy concerns from multiple agencies including Metro Planning, Public Works, Public Health, Legal and state environmental agencies. In addition, Henrietta revised the stormwater management manual based on stakeholder and staff process.

Knox County (TN)

Henrietta assisted with Stormwater Ordinance and Manual Revisions for Knox County. Her responsibilities included conducting policy research and development; formulating policy alternatives and recommendations; drafting white papers on policy research and recommendations and drafting stormwater management manual chapters.

LOCAL GOVERNMENT PROGRAM DEVELOPMENT AND ENVIRONMENTAL COMPLIANCE ASSISTANCE

Wake County (NC)

Henrietta served as project manager for a follow-on project to implement recommendations made by a stakeholder group facilitated by an earlier project, tasked with developing an action plan for Wake County (County) on-site wastewater program. The project included development of a plan for implementing the recommendations of the stakeholder group, including options for providing public education and outreach, making changes to County on-site wastewater rules, managing data collection on on-site wastewater systems, and developing a financial framework for the plan. Henrietta provided assistance in implementing some of these recommendations, such as drafting rule changes. To assist in implementation of one of the committee's public education recommendations, Henrietta designed brochure templates to be distributed by the County to residents using on-site wastewater systems.

In addition, Henrietta was project manager and facilitator for a project to lead a stakeholder group tasked with developing an action plan for the County on-site wastewater program. The year-long process involved identification of needs and issues and development of a plan to meet the needs and issues, and support of budget requests to support the action plan.

Henrietta was also project manager and client contact for program and funding study of options for expansion of on-site wastewater management program. The study led to follow-on projects during which Henrietta facilitated a stakeholder group that recommended an expanded on-site wastewater system management program.

Texas Army National Guard, Various Sites in Texas

Henrietta conducted site visits for updating Spill Prevention Control and Countermeasure Plans in compliance with local, state, and federal regulations. Collected and updated information on personnel and facility characteristics through interviews, digital photographs, GPS points (using Trimble unit), inventory of materials, and an examination of the site.

BROWNFIELDS ASSESSMENT

City of Concord (NC)

Henrietta provided public education assistance to the City of Concord in the implementation of its Brownfields Assessment Grant.

City of New Bern (NC)

Henrietta led a public education and outreach track for the City of New Bern (City) including finalization of public input plan, coordination and production of public outreach materials and leading public stakeholder group (Brownfields Steering Committee). In addition, she assisted the City in writing another EPA grant application, for area-wide planning for Brownfields Programs.

HAZARD MITIGATION AND DFIRM

City of St. Augustine (FL)

Henrietta facilitated the outreach project strategy stakeholder group and developed documentation in support of the City of St. Augustine's (City) CRS program. Through the project, the City obtained an upgrade in its CRS classification from an 8 to a 7. Henrietta also assists on additional CRS credit activities such as the development of outreach materials.

State of North Carolina, Raleigh (NC)

Henrietta was project manager for an innovative project to derive finished floor elevations in five sea level rise risk counties using mobile scanning (terrestrial LiDAR) field data for buildings inside the 0.2% annual chance floodplain and using a statistically-derived algorithm for buildings outside the floodplain. In addition, her team performed quality control field measurements of coastal structures.

In addition, Henrietta was assistant project manager for statewide aerial photography acquisition and orthophotography production for 48 of 100 North Carolina counties. She was responsible for subcontractor management and contracting, client invoicing, scope and budget control.

State of Alabama (AL)

Henrietta developed content for user-guided multimedia training CD and web application. Topics included general information on flooding and floodplains, as well as the National Flood Insurance Program, flood studies, map modernization and floodplain management. The intended audiences for the training were local government officials. Media collected and/or created included text, illustrations, animated sequences, sounds and songs, and pictures. Henrietta coordinated creative development of curriculum themes and design.

OTHER RELEVANT EXPERIENCE

NPDES Phase I or II Permit Implementation Assistance, Various Clients

Henrietta provided program assessment, developed new program component, provided training and carried out public education, involvement and other activities as staff extension.

Jennifer Tavantzis

CO-PROJECT MANAGER
Manager

PROFILE

Jennifer has a strong background in water resources and utility management, and possesses extensive data management and analytical skills. Her educational background lies in the areas of water quality, hydrology, and resource conservation. In her six years with Raftelis, she has consulted with numerous local governments on projects related to stormwater program development and review, and stormwater utility feasibility, development, implementation, and reorganization studies. Jennifer has also worked with water and sewer utilities on a wide variety of projects - from rate development and affordability analysis to revenue loss investigations - all with the common thread of being driven by existing utility data and designed to positively impact utility performance and management. Jennifer has worked extensively with GIS data and systems and with relational databases in association with water, wastewater, and stormwater utility projects. In addition to her analytical work, she has a strong knowledge of municipal finance, and serves as a Municipal Advisor Representative, which ensures her fiduciary responsibility to clients. Jennifer was also a contributing editor of the WEF's *Manual of Practice No. 27: Financing and Charges for Wastewater Systems*.

RELEVANT PROJECT EXPERIENCE

City of Philadelphia (PA)

The City of Philadelphia (City) engaged Raftelis to conduct a thorough audit of its “meter to cash” operation, comprising functions in at least four different City departments. The comprehensive project worked toward aligning the inter-departmental processes and identifying opportunities for efficiencies and cost savings throughout the utility, and ultimately increasing realized revenues. Jennifer conducted numerous interviews of staff and management with regard to customer service processes, back-office functions (payment processing, bill print and mailing, etc.), collections, billing system support, data integrity, and affordability programs and synthesized these findings along with the results of a benchmarking of industry standards to provide meaningful recommendations to the City.

City of Baltimore (MD)

Raftelis was engaged by the City of Baltimore (City) as its stormwater program implementation manager. The first major task was to assist the Bureau of Water and Wastewater (Bureau), within the Department of Public Works, with the implementation of a new stormwater fee and stormwater utility. Raftelis conducted a quick assessment of the Bureau's readiness to implement the utility, scoring the Bureau on seven major implementation areas. This quick assessment was followed by an in-depth gap analysis. One of the results of the gap analysis, in addition to a detailed assessment of the Bureau's current capacity for implementation, was a timeline for implementation, with the timing of tasks to be accomplished. The stormwater fee is slated for a go-live billing date of July 2013.

Specialties

- Stormwater finance & utility development
- Management policy & practice
- Utility rate studies
- Stakeholder engagement
- Organizational assessments

Professional History

- Raftelis: Manager (2018-present); Senior Consultant (2016-2017); Consultant (2013-2016); Associate Consultant (2012-2013)
- Colorado Department of Public Health & Environment (2011-2012)

Education

- Master of Environmental Management - Duke University (2011)
- Bachelor of Arts in Environmental Studies & Urban Planning - University of Richmond (2009)

Certifications

- Series 50 Municipal Advisor Representative

Raftelis will assist the Bureau with all aspects of implementation from data development and custom software needed for customer service provision, to policy, process development, financial, program, and outreach tasks. The project included extensive policy and process development, data quality control measures, and organizational management on an expedited timeline in order to meet an existing utility go-live date. Jennifer conducted reviews of existing policy and processes, as well as review and revision of the City's geographic data relevant to stormwater management.

Northeast Ohio Regional Sewer District (OH)

The Northeast Ohio Regional Sewer District (NEORSO) in Cleveland, OH provides wastewater service to over 50 communities in the region. In early 2013 it began billing for stormwater service to the entire region as well. Raftelis worked with the District through every step of the stormwater utility design and implementation process. Jennifer developed policy documentation for the utility's data management, customer service, credit program, inspection and maintenance program, and billing. In addition, Jennifer assisted with GIS data analysis, billing database development, and project management.

Upper Falls Watershed Multi-Jurisdictional Stormwater Utility (NC)

Five jurisdictions in the Falls Lake Watershed of Central North Carolina (County) engaged Raftelis to address pressing stormwater management issues across the region through the implementation of a coordinated stormwater funding mechanism. Raftelis worked with the jurisdictions to create a rate structure that would most appropriately and feasibly fund the planned level of service provision. Raftelis worked with each jurisdiction to determine the current and future costs associated with stormwater services and to set rates. Raftelis also assisted the jurisdictions in coordinating service activities for maximum cost savings. Raftelis developed the utility billing data for each jurisdiction, assisted them with determining the best billing and collection method (County tax bill line item), and coordinated with the County tax offices to implement the billing methodology. Raftelis also worked with the jurisdictions to develop a credits policy, as well as assisting them with extensive public and elected board meeting support and customer service representative training. The project involved complex governance, service provision, rate structure, and billing policy issues. Jennifer was involved in many aspects of complex policy development around rate structure, organizational structure, customer outreach, and other issues.

City of Raleigh Public Utilities Department (NC)

Raftelis conducted a comprehensive organizational analysis for the City of Raleigh Public Utilities Department to determine whether to relocate its stormwater utility from its existing organizational home as a division of the Department of Public Works. The assessment considered the relationship between stormwater and transportation, the efficiency of design and engineering activities, the future of regulatory compliance, and best means for customer service management. The Raftelis team was asked to compile, measure, and analyze the costs and benefits (in both quantitative and qualitative measures) of relocating the utility. The project involved extensive stakeholder input, with individual department meetings, two staff roundtable meetings, and two meetings with citizen stakeholder groups. Jennifer assisted with stakeholder feedback sessions, design and execution of the analysis, and benchmarking efforts designed to create the most effective organizational structure of the utility.

Beaufort County (SC)

Beaufort County (County) and the underlying municipalities have been cooperating in a multi-jurisdictional utility for several years. In advance of three of the participating jurisdictions being issued MS4 permits, Raftelis was included in a multi-faceted project to develop a notice of intent, conduct a rate structure analysis, and develop rates and an associated financial strategy over a five-year planning period supportive of the enhanced program. Jennifer assisted the County with development and submittal of its MS4 permit Notice of Intent. After assisting with program visioning and cost development for each of the five jurisdictions, Jennifer created a tool for the County and the municipalities to model several different rate structure options, including different ways for shared costs to be divided among the jurisdictions and conveyed to customers. The model also allowed the County and the municipalities to plan capital project work by observing the feasibility of debt issuance and its impact on rates.

City of Dallas (TX)

The City of Dallas (City) engaged Raftelis for a dual-track approach to updating the efficiency and efficacy of the mature stormwater program. First, Raftelis conducted a thorough review of the stormwater program and financial strategies in support of restructuring the stormwater utility billing mechanism and developing a revised rate structure. Second, Raftelis assisted in assessing and modifying tools and systems in use within the stormwater regulatory compliance group. Jennifer oversaw billing data development, led the policy revision efforts, and assisted with City outreach related to an updated approach to stormwater billing. Jennifer also assisted with the documentation of staff needs and resource gaps to facilitate updating the City's internal systems and processes.

City of Jackson (MS)

During a transition from an outdated utility billing system to a more modern billing application, the City of Jackson (City) engaged Raftelis to analyze the existing billing data and processes to discover why expected revenues were not being realized, and to assist with remedying any identified errors prior to transitioning to the new system. As a separate component of the project, Raftelis performed a rate study for the City to ensure revenue sufficiency over the planning period. Jennifer analyzed billing data and identified several divergences from stated billing policy to be remedied through immediate programming updates in the existing billing system, or to be addressed during conversion. Jennifer also used the available historical data to quantify revenues and detail consumption patterns over previous years as a critical input into the rate study.

Carlisle Borough (PA)

Raftelis was engaged by the Borough of Carlisle (Borough) to provide assistance in assessing the financial needs of its growing stormwater program and evaluating the feasibility of a fee as the most appropriate funding mechanism. Jennifer served as project manager during this successful effort. Jennifer coordinated and oversaw a comprehensive review of all operating and capital costs, specifically identifying and quantifying costs related to existing stormwater program elements, which at that time were primarily categorized as Streets-related costs. Jennifer was also the primary developer of a flexible financial planning and rate model. Subsequent to the feasibility study, Raftelis was engaged by the Borough to implement the stormwater fee based on implementation and data maintenance considerations and recommendations made during the feasibility phase. After a great deal of outreach led by Raftelis, the Borough implemented the new utility fee in 2019.

Lower Paxton Township (PA)

Raftelis was engaged by Lower Paxton Township (Township) to evaluate the feasibility of establishing a stormwater fee as the funding mechanism for the Township's growing stormwater program. Jennifer serves as project manager of this project. At the time the feasibility study started, the Township had recently established a Chesapeake Bay Joint Pollutant Reduction Plan (PRP) with neighboring jurisdictions to achieve huge reductions in sediment loading required by TMDLs in receiving waterbodies. Jennifer coordinated Raftelis' work with the Township to evaluate its current program and envision the scope and costs of the future program, with elements both included in and excluded from the PRP. The funding requirements to sustain the program were modeled by Jennifer alongside a preliminary rate base estimate that relied on digitization of a sample of single-family residential properties and expert estimation of other impervious surface areas. After a great deal of outreach led by Raftelis, the Township implemented the new utility fee in 2019.

ADDITIONAL PROJECT EXPERIENCE

-] City of Baltimore (MD) - Stormwater utility implementation
-] City of Burlington (NC) - Stormwater utility feasibility study
-] City of Concord (NH) – Stormwater utility feasibility study
-] Beaufort County (SC) - Multi-jurisdictional stormwater rate structure analysis and rate study
-] City of Charlotte/Mecklenburg County (NC) - Stormwater utility data and policy update
-] City of Dallas (TX) - Stormwater program review and update
-] City of Durham (NC) - Water and sewer rate study; water supply enhancement economic feasibility assessment
-] Durham County (NC) – Stormwater utility implementation
-] City of Fayetteville (NC) - Stormwater program evaluation

-] Town of Holly Springs (NC) – Stormwater utility stormwater rate structure analysis and rate study
-] City of Jackson (MS) - Water utility billing data review and process assessment
-] Town of Kernersville (NC) - Stormwater program strategic planning
-] Town of Lexington (MA) – Stormwater utility feasibility study
-] Modesto Irrigation District (CA) - Drainage maintenance cost allocation study
-] Town of Mooresville (NC) - Stormwater utility feasibility study
-] Town of Mount Pleasant (SC) - Cost-of-service study
-] Newport News (VA) - Water utility rate study and affordability analysis
-] Northeast Ohio Regional Sewer District - Stormwater utility development and implementation
-] City of Philadelphia (PA) - Water department management assessment
-] City of Raleigh Public Utilities Department (NC) - Stormwater utility organizational assessment & benchmarking study
-] City of Richmond (VA) - Proposed rate study impact analysis
-] Sewerage and Water Board of New Orleans (LA) - Rate study; fee-in-lieu study
-] Upper Falls Watershed Multi-Jurisdictional Stormwater Utility (NC) - Stormwater utility implementation; stormwater services manager
-] Town of Westford (MA) – Stormwater utility feasibility study and implementation

To: Philadelphia Water Department (PWD)	From: Raftelis Financial Consultants
Task Name: 2020 Rate Case Reporting	Project Number:
Document: Typical Residential Customer Consumption	Date: January 14, 2020

The purpose of the memorandum is to provide an overview of the methodology used to determine monthly consumption for a typical residential customer account. PWD has defined 'typical residential usage' as the median usage for which a general service residential customer (GS-R, customer type 4, installation type 08, 09, 10, 11) as billed within a given fiscal year. In addition, customer information is adjusted to exclude any zero bills or those that indicated negative consumption as these consumption levels indicate usage adjustments or inactive accounts, respectively. In order to document consumption for a typical customer, Raftelis analyzed residential usage by month over the most recently available fiscal years. The reports for FY2015 through FY2019 GS-R customers show slightly decreasing consumption, but trends that are still consistent with a 5 Ccf monthly typical value.

Table 1 shows median consumption values for GS-R in each of the five most recent reporting periods. These values exclude any zero bills or those that indicated negative consumption.

Table 1. Summary Statistics for GS-R Customer Consumption

	FY 2015 (CCF)	FY 2016 (CCF)	FY 2017 (CCF)	FY 2018 (CCF)	FY 2019 (CCF)
JUL	5	5	5	5	5
AUG	5	5	5	4	5
SEP	5	5	5	5	5
OCT	5	5	5	5	4
NOV	5	5	5	5	5
DEC	5	5	5	5	5
JAN	5	5	5	5	4
FEB	5	5	4	5	5
MAR	5	5	5	5	5
APR	5	5	5	4	4
MAY	5	5	5	5	5
JUN	5	5	5	5	5

The analysis shows that GS-R accounts have consistently used 5 Ccf of metered consumption per month at the median over the time period in question. As a result, we recommend that calculations of a typical residential bill continue to reflect 5 Ccf of consumption for the purposes of calculating water and sewer volumetric charges.

PWD also requested that Raftelis determine typical usage for customers receiving the Senior Citizen Discounted (SCD) bill. These customers are outside of the GS-R category. Rather, they have a customer type of D. Raftelis analyzed these bills separately, using the same methodology to assess the consumption patterns of the SCD category. Table 2 shows median consumption values for SCD customers for the most recent fiscal year.

Table 2. Summary Statistics for SCD Customer Consumption

FY 2019 (CCF)	
<i>JUL</i>	3
<i>AUG</i>	3
<i>SEP</i>	4
<i>OCT</i>	3
<i>NOV</i>	3
<i>DEC</i>	3
<i>JAN</i>	3
<i>FEB</i>	3
<i>MAR</i>	3
<i>APR</i>	3
<i>MAY</i>	3
<i>JUN</i>	3

The analysis shows that SCD accounts have consistently used 3 or 4 Ccf of metered consumption per month at the median over the most recent fiscal year. As a result, we recommend that, for this rate case, calculations of a typical senior bill reflect 3 Ccf of consumption for the purposes of calculating water and sewer volumetric charges.

To: Philadelphia Water Department (PWD)	From: Raftelis Financial Consultants
Task Name: 2020 Rate Case Reporting	Project Number:
Document: Small Commercial Customer Consumption	Date: January 20, 2020

The purpose of the memorandum is to provide an overview of the methodology used to determine attributes for a typical small commercial account. The Water and Sewer Rate Board has been charged with communicating customer impacts on small commercial customers as part of the rate proceeding. Raftelis Financial Consultants (Raftelis) has queried the City's water billing system, basis2, to determine the meter size and monthly consumption for small commercial customers billed in FY2019.

Raftelis determined the meter size for a typical small commercial account. Analysis showed there were approximately 29,000 accounts that were designated as commercial with 5/8" meters and approximately 3,000 accounts with 1" meters. Therefore, the 5/8" meter size, making up a much larger proportion of small meter customers was more typical and should be used for the small commercial designation.

Raftelis then determined the consumption associated with a typical small commercial account. PWD has defined "typical usage" as the median usage for which a commercial customer (customer type '4', 'G', 'P' and installation type '09', '13', '14', '15', '16', '17', '18', '21', '22', '23', '24', '25', '26', '33') as billed within a given fiscal year. In addition, customer information is adjusted to exclude any zero bills or those that indicated negative consumption as these consumption levels indicate usage adjustments or inactive accounts, respectively. In order to document consumption for a typical customer, Raftelis analyzed usage by month over the most recently available fiscal year. The table below shows median consumption values for the most recent reporting period.

FY 2019 (CCF)

JUL	6
AUG	6
SEP	7
OCT	6
NOV	6
DEC	6
JAN	6
FEB	6
MAR	6
APR	6
MAY	6
JUN	6
Annual	6

The analysis shows that commercial accounts have consistently used about 6 Ccf of metered consumption per month at the median over the time period in question. As a result, we recommend that a typical small commercial bill be calculated based on a 5/8" meter size and 6 Ccf of consumption.
