As Philadelphia residents and workers restart economic and physical activities, they must do so safely—that is, in a way that prevents the COVID-19 virus from spreading from person to person. Everyone must take precautions consistently to protect not only themselves, but also their family members, friends, colleagues, and everyone else.

The precautions will vary by the activity and setting, but some general guidelines apply to all.

**Safety Checklist**

### Masks
Block the virus from spreading from infected individuals by wearing masks and requiring others to wear them.

### Barriers
Use sneeze guards or plexiglass screens to prevent respiratory droplets expelled by infected persons from reaching others.

### Isolate
Keep people who might be carrying the virus safely away from others (ideally at home).

### Distance
Maintain space between people to reduce the chance that one infected individual will infect others.

### Reduce crowds
Decrease the number of people that an infected person could pass the virus to if other steps are not successful.

### Handwashing
Reduce the spread of virus from one person to another from touching contaminated surfaces.

### Clean
Remove respiratory droplets that may contain virus from surfaces that people may touch.

### Communicate
Ensure staff, customers, and others taking part in permitted activities understand this Safety Checklist.

### Masks REQUIRED

This Safety Checklist must be followed at all times. If an employee, customer, or participant develops COVID-19 infection or has a positive test, businesses and other organizations must take additional precautions to stop the virus from spreading further, as described in *Guidance for Essential Businesses and Organizations During COVID-19*. Required precautions include calling the Philadelphia Department of Public Health at 215-685-6741 to report positive cases.

If employees or customers want to report possible health and safety violations in the workplace related to COVID-19, please call 311.

If you have questions or concerns about the applicability of these guidelines to your business, please email business@phila.gov.

Note that guidance in this document is subject to change. Please check back for updates.

This document is intended as a plain language summary of rules for reopening in the Yellow Phase and does not replace the need to follow all applicable federal, state, and local laws and regulations.

Protections Needed

Masks
• Provide masks for employees.
• Require employees and clients to mask while on-site except only:
  – As necessary for the employee to eat or drink during break times. The employee should be seated at least 6 feet from others when taking off mask.
  – When seated alone in a private office or in a cubicle whose sides extend above the head of the employee.

Barriers
• If the office remains open to the public, install plastic barriers between staff and the public.
• For workers in low cubicles and those who work in open office designs, use plastic barriers if needed to extend cubicle walls above workers’ heads and to separate those working in spaces with open designs.

Isolate
• Screen every employee for symptoms before every shift and prevent them from remaining on site if they have cough, shortness of breath, fever, chills, muscle pain, or new loss of taste or smell.
• It is not necessary to conduct on-site temperature measurement for staff or customers. If you measure temperatures, use a no-touch thermometer, and do not allow anyone with a temperature of 100.4 or higher to remain on-site.
• Screen staff and potential buyers and sellers for symptoms before every interaction and reschedule home showings if they have cough, shortness of breath, fever, chills, muscle pain, or new loss of taste or smell.

Handwashing
• Place handwashing stations or hand sanitizer at office entry and outside communal bathrooms for all staff and visitors with prominent signage promoting use.
• Give staff hourly handwashing breaks.
• Require all persons entering a property being shown to immediately wash their hands or to use hand sanitizer and wear a face mask or covering.

Clean
• Wipe down any surfaces touched during a showing with a sanitizing wipe or disinfecting cleaner (after discussing with seller before showing) and suggest the seller also disinfect the property. See CDC guidance for details.

Communicate
• Educate staff and clients about strategies to prevent spread of COVID-19.
• Post prominent signs at entrances, in employee break rooms, and in materials for buyers and sellers:
  – Asking people who are sick or have had contact with someone with COVID-19 within the past 14 days not to come into office or hold or attend a showing.
  – Encouraging people to cover coughs or sneezes.
  – Mandating physical distancing of at least 6 feet for both clients and staff.
  – Mandating that all staff and clients wear masks.
