REOPENING GUIDANCE

Libraries

The following is intended as a plain language summary of rules for reopening in the Green Phase and does not replace the need to follow all applicable federal, state, and local laws and regulations.

Protections Needed

 Masks
- Provide cloth masks for employees; however, employees are welcome to use their own cloth masks as well.
- Require employees and visitors over age 2 to mask while on site except only:
  - As necessary for the employee to eat or drink during break times. The employee should be seated at least 6 feet from others when taking off mask.
  - When seated alone in a private office or in a cubicle whose sides extend above the head of the employee.

 Barriers
- Install plastic or plexiglass barriers at information and check-out desks to physically separate staff and visitors.
- Best practice: Issue face shields to individual staff for interactions that may be closer than 6 feet. Face shields should not be shared and do not replace the need for a mask unless there is a medical reason a mask cannot be worn.

 Isolate
- The Free Library: Follow the COVID Screening Policy for City Employees (policy version 1 issued June 5, 2020) which should be administered prior to the start of each onsite shift or workday. This document is included with this guidance and the self-administered assessment tool is available at philav/employee-screener.
- It is not necessary to conduct onsite temperature measurement for staff or visitors. If you measure temperatures, use a no-touch thermometer, and do not allow anyone with a temperature of 100.4 or higher to remain onsite.

- Have sick leave policies in place so that employees excluded from the workplace do not lose earnings.
- If an employee develops COVID-19 infection or has a positive test, businesses and other organizations must take additional precautions to stop the virus from spreading further, as described in Guidance for Essential Businesses and Organizations During COVID-19. Required precautions include calling PDPH at 215-685-5488 to report positive cases.

 Distance
- Adjust work assignments to ensure employees can stay at least 6 feet from each other and from visitors throughout their shifts and use barriers as above where this is not possible.
- Use floor decals or other visual cues to encourage spacing by visitors.
- Adjust seating to be at least 6 feet apart; avoid placing chairs facing each other across tables.
- If library has a community room, block off rows and seats to require 6-foot distance between persons other than family groups.

 Reduce crowds
- Limit occupancy to a maximum of 5 total staff and visitors for every 1,000 square feet of public and non-public space in the facility (a rule of thumb of 113 square feet per person is used in this calculation).
  - Post this temporary occupancy limit publicly.
- Encourage use of e-books and online resources.
- Avoid activities in which visitors come together in groups if they cannot remain at least 6 feet apart (story time, other group activities) and limit group size to 25 even with spacing.

 Handwashing
- Place handwashing stations or hand sanitizer at entry, break rooms, and outside communal bathrooms for all staff and visitors with prominent signage promoting use.
- Give staff hourly handwashing breaks.

 Clean
- Wipe down high-touch surfaces with disinfectant at least every 4 hours. See CDC guidance for details.
- Keep books and other materials that cannot be safely cleaned out of circulation for at least 3 days.
- For electronics, such as tablets, touch screens, and keyboards:
  - Put wipeable covers on electronics and clean between each user.
  - Follow manufacturer’s instruction for cleaning and disinfecting.
  - If no guidance, use alcohol-based wipes or sprays containing at least 70% alcohol. Dry surface thoroughly.
Ventilation
• If possible, increase ventilation in the building by either:
  – Opening windows and/or doors on opposite sides of the building and using fans to blow outside air through the building OR
  – Optimizing ventilation provided by the heating, ventilation, and air conditioning (HVAC) system by:
    • Having the HVAC system checked to assure that it is working properly. If it can be adjusted, the system should be set to provide at least 6 air exchanges per hour.
    • Maximizing the amount of outside air circulated by the system.
    • Installing filters with minimum efficiency reporting values (MERV) of 13, or the highest compatible with the filter rack. It is not necessary to use high-efficiency particulate air (HEPA) filters or ultraviolet light irradiation systems.
    • Checking that the external air inlet duct is not blocked and that it is at least 15 feet from people.

Communicate
• Educate staff about strategies to prevent spread of COVID-19.
• Post prominent signs at entrances:
  – Asking people who are sick or who have had contact with someone with COVID-19 within the past 14 days not to enter.
  – Encouraging people to cover coughs or sneezes.
  – Mandating physical distancing of at least 6 feet.
  – Mandating that all staff and visitors wear masks with reminders about how to do so appropriately (staff should be encouraged to enforce this practice for visitors).
