

WHAT'S A GOOD MASK?

1

MATERIALS THAT FILTER DROPLETS IN THE AIR

- Commercially-produced medical (polypropylene), or...
- Two-ply or dense-weave cloth
- NO loose-knit materials

2

GOOD SEAL ALONG THE BRIDGE OF YOUR NOSE, CHEEKS, AND CHIN

- Flexible metal stay to bend over bridge of nose, or elastic that can be pulled tight across cheeks
- Stretchy ear-loops so that mask can be pulled tight to face
- NO bandanas or masks that are loose below the mouth

3

NO VALVES!

HOW TO WEAR YOUR MASK

- Cover your mouth AND nose
- Pull tight to seal along cheeks, nose, and chin
- DO NOT lower your mask to talk to others

WHEN TO WEAR A MASK

- Whenever you are indoors with persons other than your household members

- Whenever you are outdoors within 6 feet of persons other than your household members.
