

Chestnut Street and Walnut Street

Parking and Loading Survey

Summer 2021

In 2022, more than six miles of Chestnut and Walnut Streets are scheduled to be repaved by PA Department of Transportation (PennDOT) contractors. This will include Chestnut Street from 63rd to 34th Street, and Walnut Street from 22nd Street to 63rd Street. The goals of the project are to calm vehicle traffic and create safer streets for people who walk, take transit, and bike.

The City of Philadelphia Managing Director's Office of Transportation, Infrastructure, & Sustainability is gathering information about business parking and loading needs in advance of the project to make sure that business activities are not negatively impacted. Your answers to the survey will help the city design a Chestnut Street and Walnut Street that serves the needs of all users, including businesses such as yours.

Please take a few minutes to fill out the survey.

This information won't be used outside the context of the project.
