

## **FY21 Congregate Care Evaluation Report: Update Statement**

This is a scoring update to the Fiscal Year 2021 Congregate Care Report. After the conclusion of Fiscal Year 2021, DHS had the opportunity to re-assess a Serious Incident that occurred at Woods Services. Based on additional analyses conducted by the state, the allegation was determined to be Invalid. This Serious Incident, as one of our evaluation indicators, should no longer be factored into Woods' final evaluation score. DHS recalculated Woods' score to be in line with the new determination:

- Woods performance level changed from "Needs Improvement" to "Fair".
- And at the overall congregate care system level, there were two validated Serious Incidents that took place at two providers (instead of three).
