HOW MUCH DO YOU KNOW ABOUT COVID-19?

Circle **T** for True or **F** for False

1. Although COVID-19 is airborne, it can spread through the pores on your skin. **T or F**
2. The name COVID-19 comes from 'CO' meaning corona, 'VI' meaning virus, 'D' meaning disease, and '19' meaning 2019. **T or F**
3. Using hand sanitizers and washing your hands frequently are not effective at preventing the spread of COVID-19. **T or F**
4. The symptoms of COVID are guaranteed to be mild and non-serious if you are young and healthy. **T or F**
5. COVID-19 spreads through small airborne droplets that masks help filter out. **T or F**
6. COVID-19 vaccines alter your DNA to help your body learn how to fight the virus. **T or F**
7. A mild reaction to a vaccination is common, and often a sign that your immune system is reacting properly to fight COVID-19 if you are exposed. **T or F**
8. Reinfection with COVID-19 is possible after you have already contracted and recovered from the virus. **T or F**
9. It is impossible for you to contract COVID-19 if you are vaccinated. **T or F**
10. A helpful resource to call with questions or for more information is the Department of Health's COVID-19 Containment call center (215-685-5488). **T or F**

Answers on page 9.

ANSWER KEY

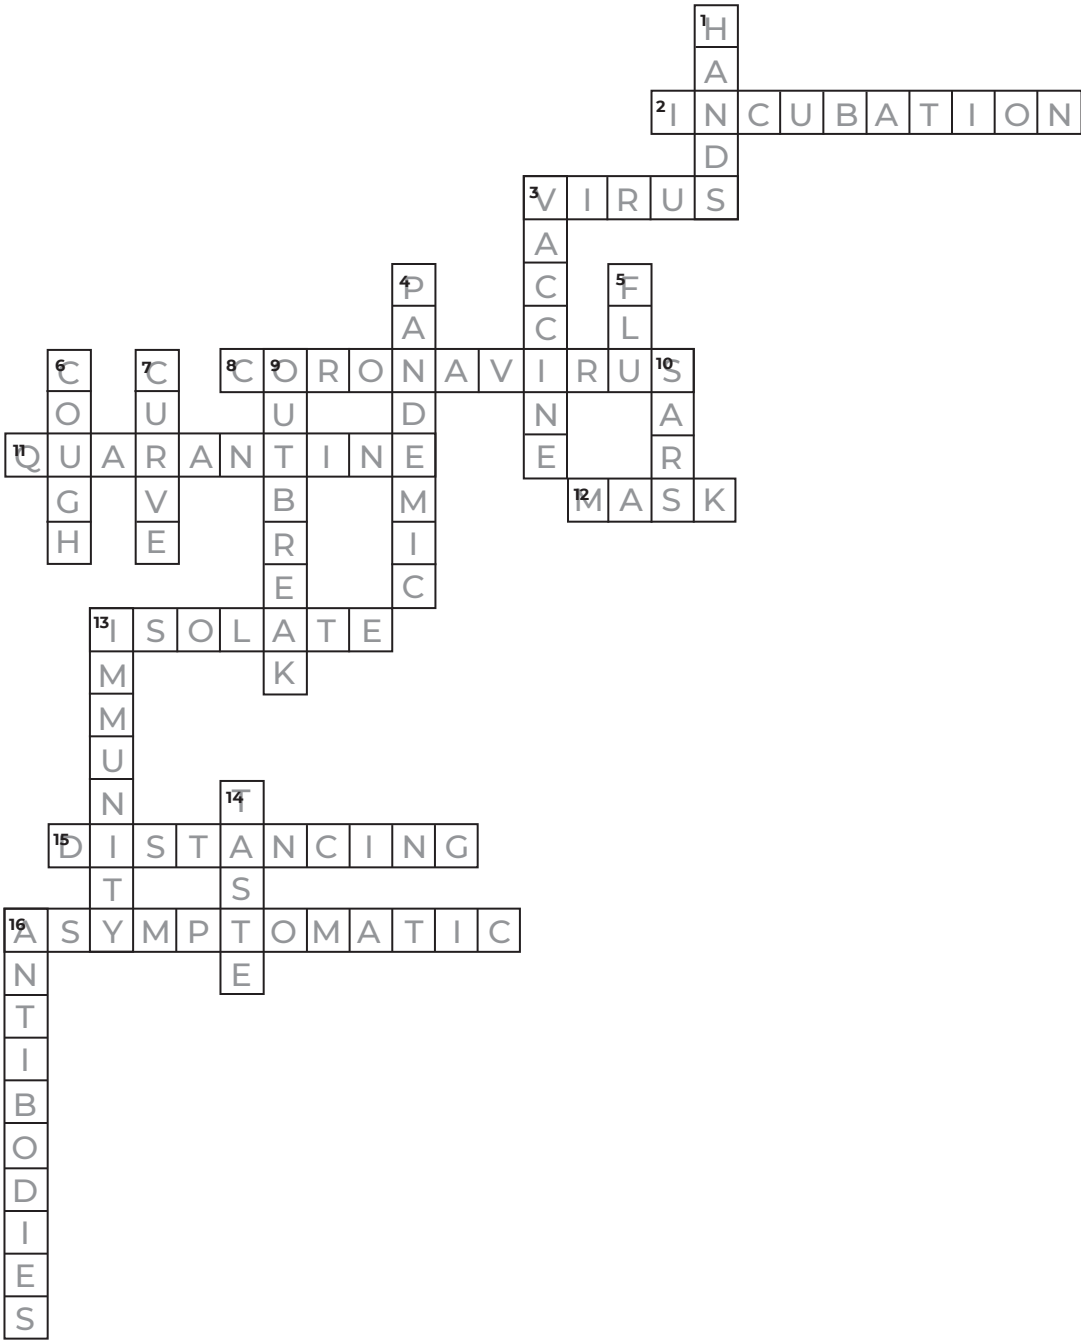

Page 2

1. **F** - COVID-19 spreads when an infected person breathes out droplets and very small particles that contain the virus. These droplets and particles can be breathed in by other people or land on their eyes, noses, or mouth. It is not capable of entering your pores.
2. **T** - Diseases are named to enable discussion on disease prevention, spread, transmissibility, severity and treatment.
3. **F** - Hand sanitizers and soaps have been shown to be very effective at preventing the spread of COVID-19.
4. **F** - The age of a person is not an indicator of how severely they may become sick if infected with COVID-19.
5. **T** - The evidence is clear that masks can help prevent the spread of COVID-19 and that the more people wearing masks, the better.
6. **F** - COVID vaccines do teach your body how to fight the virus, but the vaccine does not alter your DNA.
7. **T** - You may have some side effects, which are normal signs that your body is building protection.
8. **T** - In general, reinfection means a person was infected (got sick) once, recovered, and then later became infected again. Based on what we know from similar viruses, some reinfections are expected. We are still learning more about COVID-19.
9. **F** - If you're vaccinated, you're far less likely to contract COVID-19, but it is not impossible.
10. **T** - The COVID-19 Containment call center is an excellent resource that can provide you answers to many COVID-19 related questions.
