

CRASHES ON 11TH STREET FROM MASTER STREET TO DIAMOND STREET

CRASH MAP LEGEND

- Bicyclist or pedestrian fatality or serious injury
- Motor vehicle occupant fatality or serious injury
- Other crash type involving a bicyclist or pedestrian
- Other crash type involving motor vehicles

CONTRIBUTING FACTORS TO CRASHES

- Wide, unmarked lanes encourage people in vehicles to drive aggressively on this local neighborhood street.
- Faded and missing crosswalks that make it harder for people walking to safely cross at intersections.
- People in vehicles run red lights, putting people driving, walking, and biking through the intersection at risk.

CRASHES IN PROJECT AREA

There were **24 crashes** on N 11th Street between 2017 and 2021, with most centered around Cecil B. Moore Avenue. **18** crashes were angled at intersections, and **3** involved pedestrians.

DEATHS AND INJURIES

25 people were injured, with **1** serious injury crashes on N 11th Street between 2017 and 2021.
