

## CRASHES ON LIMEKILN PIKE FROM MEDARY AVENUE TO HAINES STREET

### CONTRIBUTING FACTORS TO CRASHES

- Wide, unmarked lanes encourage people in vehicles to speed and drive aggressively on this local neighborhood street.
- Missing or faded crosswalks that make it harder for people walking to safely cross at intersections.
- Complicated and wide intersections make it confusing to walk, bike, and drive safely through an intersection.
- People driving running red lights, putting people driving, walking, and biking through the intersection at risk.

### CRASHES IN PROJECT AREA

There were **47 crashes** on Limekiln Pike between 2017 and 2021. **29** crashes were angled at intersections, and **6** involved pedestrians.

### DEATHS AND INJURIES

**38** people were injured, with **1** fatal crash and **1** serious injury crash on Limekiln Pike between 2017 and 2021.
