

Project Fast Facts

Project Description

The City of Philadelphia Department of Streets (COP-DOS), in coordination with Pennsylvania Department of Transportation (PennDOT) is proposing improvements at two intersections along Parkside Avenue to promote safe and efficient use of the corridor intersections by all users.

Parkside Avenue intersections of Bryn Mawr Avenue and 53rd St are located within the City's High Injury Network. The improvements will be consistent with the citywide Vision Zero Program.

Project Objectives

- Reduce congestion by improving roadway geometry and lane configurations
- Improve safety and operations of intersections by adding traffic calming measures at approaches to reduce speeds
- Improve pedestrian accessibility at the intersections
- Enhance connectivity to local recreational facilities
- Upgrade sidewalks, signals, ADA accessibility, pavement markings, drainage structures, and street lighting

Limits of Work:

- Parkside Avenue and Bryn Mawr Avenue Intersection
- Parkside Avenue and 53rd Street Intersection

Project Sponsors:

- City of Philadelphia Department of Streets
- Pennsylvania Department of Transportation

Public Open House #.1:

Held May 2023

Public Open House #2:

Held October 2023

Public Open House #3:

Spring 2025

Final Design Complete:

Late Summer/Early Fall 2025

Construction Anticipated:

Spring 2026

Construction Complete:

Spring 2027
