

Frankford Creek Greenway

Above: Completed Phase 2 at Adams Avenue & Aramingo Avenue

Background

The envisioned Frankford Creek Greenway runs between Ramona Avenue and N Delaware Avenue. It's part of the Circuit Trails Network, which is the region's nine county trail network. The Frankford Creek Greenway connects the Tacony Creek Trail to the Delaware River Trail. The extension of the Frankford Creek Greenway from Ramona Ave to N Delaware Ave is split into four segments (1, 2, 3, 4). Two of these Phases (1 & 2) are now complete.

Project Goals

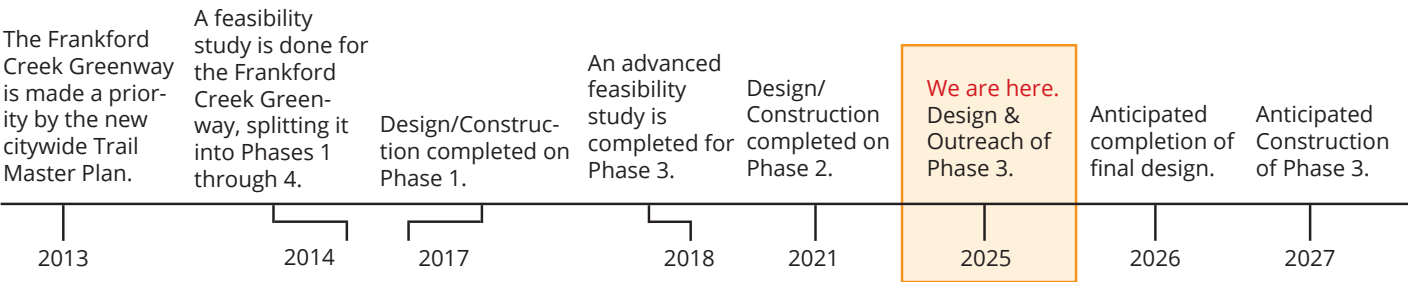

The goal of this project is to provide Frankford & Juniata residents with safe access to open space and recreational opportunities as well as a way to reach destinations without a motor vehicle. Womrath Park, Piccoli Playground, and Tacony Creek Park will all have direct trail connections.

Project History

The feasibility study for this project was completed in 2014. Design & Construction was completed by PennDOT on phases 1 & 2, which were completed in 2017 and 2021, respectively. The pandemic and staffing changes caused a delay of several years before the Philadelphia Streets Department took over the remaining projects: Phases 3 & 4.

Why is this important?

Multi-purpose and ADA accessible trails provide residents with opportunities to safely walk, roll, or ride a bicycle for exercise or to get where they need to go. This trail will connect residents to school, work, open space, transit stops, and community resources, without having to navigate busy roads.
