

ADDRESS: 1730 WHARTON ST

Proposal: Legalize windows, with modifications

Review Requested: Final Approval

Owner: Pelican Point Investments LLC

Applicant: Neil Sklaroff, Esq., Dilworth Paxson

History: 1888; 18th Street Methodist Episcopal Church/Friendship Baptist Church;

J. Franklin Stuckert, architect

Individual Designation: 9/14/1988

District Designation: None

Staff Contact: Kim Chantry, kim.chantry@phila.gov

OVERVIEW: This application proposes legalizing aluminum windows installed without the Historical Commission's approval or a building permit throughout the building at 1730 Wharton Street. Some of the windows and infill would be modified to better fill the masonry openings. Located at the southeast corner of Wharton Street and S. 18th Street, the former 18th Street Methodist Episcopal Church, constructed about 1888, historically featured wood windows with marbled blue glass. Between fall 2018 and summer 2019, many of the historic windows were removed without the Historical Commission's review or approval. The original frames and some of the original marbled blue glass windows remained.

At its 14 August 2020 meeting, the Historical Commission adopted the Architectural Committee's recommendation for an application proposing complete restoration of the building's exterior as part of a conversion to multi-unit residential use. The approval was conditioned on the windows being wood or aluminum-clad wood at the side elevations, including the installation of stacked double-hung windows in the double-height openings, provided the muntin patterns matched those of the historic windows, and the mullion between the windows at the new floor level was as minimal as possible; the marbled blue glass windows were retained, restored, or replicated in the front façade openings and communal spaces; and the louvers at the corner towers were retained, with the understanding that glass or operable windows may be installed behind them. In May 2021, the Historical Commission's staff approved window shop drawings by Seaquay Architectural Millwork Corporation that proposed all new wood windows sufficiently replicating the historic appearance and included the character-defining marbled blue glass where appropriate. It appears that Seaquay Architectural Millwork Corporation went out of business, and the windows shown in the approved shop drawings were never purchased. Instead, aluminum windows with grilles between the glass and of sizes that do not fit the masonry openings were installed throughout the building in early 2025 without any approvals or permits. The Department of Licenses and Inspections issued a violation for the exterior work and a Stop Work Order at the request of the Historical Commission, prompting this request for legalization from the property owner/developer.

In April 2025, the Architectural Committee reviewed an application for legalization and recommended denial. The application was continued several months to allow the applicant to work on a revised proposal, which was presented to the Historical Commission at its July 2025 meeting. The Historical Commission considered the revised application, offered recommendations for additional information to be submitted, and voted to remand the application back to the Architectural Committee for review of the revised application and the details to be provided. The revised application requests permission to retain most of the aluminum windows but proposes modifications within some masonry openings to attempt to better fill the openings like the historic windows had. The revised application also proposes a new design within the monumental opening on Wharton Street that is intended to simulate the historic design.

SCOPE OF WORK:

- Legalize replacement windows

STANDARDS FOR REVIEW:

- *Standard 6: Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*
 - The new windows, even with proposed modifications, do not match the old in design, color, texture, or materials. This application fails to satisfy Standard 6.

STAFF RECOMMENDATION: Denial, pursuant to Standard 6.

ADDRESS: 1730 WHARTON ST

Proposal: Legalize windows

Review Requested: Final Approval

Owner: Pelican Point Investments LLC

Applicant: Rich Villa, Ambit

History: 1888; Eighteenth Street Methodist Episcopal Church/Friendship Baptist Church; J.

Franklin Stuckert, architect

Individual Designation: 9/14/1988

District Designation: None

Staff Contact: Kim Chantry, kim.chantry@phila.gov

OVERVIEW: This application proposes legalizing vinyl windows installed throughout the building at 1730 Wharton Street. Located at the southeast corner of Wharton Street and S. 18th Street, the former 18th Street Methodist Episcopal Church, constructed about 1888, historically featured wood windows with marbled blue glass. Between fall 2018 and summer 2019, many of the historic windows were removed without Historical Commission review or approval. The original frames and some of the original marbled blue glass windows remained.

At its 14 August 2020 meeting, the Historical Commission adopted the Architectural Committee's recommendation for an application proposing complete restoration of the building's exterior as part of a conversion to multi-unit residential use. The approval was conditioned on the windows being wood or aluminum-clad wood at the side elevations, including the installation of stacked double-hung windows in the double-height openings, provided the muntin patterns matched those of the historic windows, and the mullion between the windows at the new floor level was as minimal as possible; the marbled blue glass windows were retained, restored, or replicated in the front façade openings and communal spaces; and the louvers at the corner towers were retained, with the understanding that glass or operable windows may be installed behind them. In May 2021, Historical Commission staff approved window shop drawings by Seaquay Architectural Millwork Corporation that proposed all new wood windows sufficiently replicating the historic appearance and included the character-defining marbled blue glass where appropriate. It appears that Seaquay Architectural Millwork Corporation went out of business, and the windows shown in the approved shop drawings were never purchased. Instead, vinyl windows with grilles between the glass and of sizes which in no way fit the masonry openings were installed throughout the building in early 2025 without any approvals or permits. The Department of Licenses and Inspections issued a violation for the exterior work and a Stop Work Order at the request of the Historical Commission's staff, prompting this request for legalization from the property owner/developer.

SCOPE OF WORK:

- Legalize window replacement.

STANDARDS FOR REVIEW:

The Secretary of the Interior's Standards for the Treatment of Historic Properties and Guidelines include:

- *Standard 6: Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*
 - The vinyl windows do not match the old in design, color, texture, or materials. This application fails to satisfy Standard 6.

STAFF RECOMMENDATION: Denial, pursuant to Standard 6.

START TIME OF DISCUSSION IN ZOOM RECORDING: 01:40:53

PRESENTERS:

- Ms. Chantry presented the application to the Architectural Committee.
- Attorney Meredith Ferleger, architect Rich Villa, and owner-developer Khalfani Leslie represented the application.

DISCUSSION:

- Ms. Ferleger explained that the original window company selected for the project went out of business. Soon after, a neighborhood organization filed a conservatorship action, seeking to take control of the redevelopment that was already underway but was not moving fast enough for the neighbors. She explained that the property owner then became subject to the jurisdiction of the court, which put a tight deadline on the developer to make progress on the project. She concluded that this process is what led to the quick installation of the vinyl windows.
 - Ms. Stein responded that the windows that were installed do not meet historic preservation standards and asked what next steps will be taken to correct them.
- Mr. Villa stated that the original openings were not changed, but were filled with windows that did not replicate what was shown on the original drawings. He stated that they are looking for options that will satisfy historic preservation requirements.
 - Ms. Stein reiterated that the vinyl windows do not satisfy preservation standards and asked about next steps. She asked if the developer intends to purchase new windows.
- Mr. Leslie stated that it has been difficult to get to this stage. He stated that they have looked at different window manufacturers. He stated that they looked into the option of mapping the design of the original look on the glass, so that it looks as if it is a tint that goes on the interior of the window. He stated that the other option is to retrofit the glass.
- Ms. Stein asked if quotes for appropriate windows had been obtained from other companies after Seaquay Architectural Millwork Corporation went out of business.
 - Mr. Leslie responded that he has tried to meet deadlines as far as the development timeframe and the neighbors' requests. He explained that the vinyl windows secured the building so that the interior work could continue. He stated that the deposit with Seaquay was transferred to a window company in Arizona, and the cost skyrocketed.
 - Ms. Stein responded that Mr. Leslie could submit an application for financial hardship, and that his attorney could advise him on that process. She reiterated that the vinyl windows do not respect the building or the masonry openings, and the Architectural Committee cannot recommend approval.
- Mr. McCoubrey noted the huge cost difference between the vinyl windows which were installed and the appropriate windows to replicate the historic appearance.

PUBLIC COMMENT:

- None.

ARCHITECTURAL COMMITTEE FINDINGS & CONCLUSIONS:

The Architectural Committee found that:

- In May 2021, the Historical Commission's staff approved window shop drawings by

Seaquay Architectural Millwork Corporation that proposed all new wood windows sufficiently replicating the historic appearance and included the character-defining marbled blue glass where appropriate.

- Vinyl windows with grilles between the glass that do not fit the masonry openings and include infill material were installed throughout the building in early 2025 without any approvals or permits.

The Architectural Committee concluded that:

- The vinyl windows do not match the old in design, color, texture, or materials. This application fails to satisfy Standard 6.

ARCHITECTURAL COMMITTEE RECOMMENDATION: The Architectural Committee voted to recommend denial, pursuant to Standard 6.

ADDRESS: 1600-06 E BERKS ST

Proposal: Construct eight townhouses

Review Requested: Final Approval

Owner: Harry Siebert

Applicant: Thomas Keller, CANNObdesign

History: 1885; St. Laurentius Church; Edwin Forrest Durang, architect; demolished in 2022

Individual Designation: 7/10/2015

District Designation: None

Staff Contact: Jon Farnham, jon.farnham@phila.gov

OVERVIEW: This application proposes to construct eight three-story townhouses on a vacant lot in Fishtown. St. Laurentius Church, which was designated in 2015, stood on the site until 2022, when it was demolished. The church was vacant at the time of designation and the property owner, the Archdiocese of Philadelphia, claimed that it was in such poor condition that repair was infeasible. After designation, a developer placed the church property under contract and designed an adaptive reuse plan, but a community group obstructed the project and eventually thwarted the plan to reuse the historic church. In 2020, the Archdiocese sold the property to a second developer, who applied to the Historical Commission to demolish the church, claiming that the towers were structurally unstable and posed a public safety hazard. The Department of Licenses and Inspections agreed with the structural assessment and requested that the

To whom it may concern,

Please find the enclosed documents regarding the conversion of 1730 Wharton Street from a Church into 14 Residential Units. The owner of the property is Pelican Point Investments at 1834 Pemberton Street, Philadelphia, PA.

This proposal seeks to legalize the installation of Vinyl Windows in lieu of the originally proposed windows.

This application seeks final approval.

I look forward to the Committee's interaction.

Thank You,

A handwritten signature in blue ink, appearing to read 'Rich Villa'.

Rich Villa, Partner, Ambit Architecture
