OVERVIEW: This application proposes legalizing signage installed without a permit at 124 S. 16th Street. At the request of the Historical Commission's staff, the Department of Licenses and Inspections issued a violation for the signage installed without a building permit, prompting this request for legalization. The new signage includes a small projecting sign by the doorway and a large acrylic channel letter wall sign at the storefront transom. The storefront was installed in 1921, when the building transitioned from residential to mixed use. The Historical Commission previously approved an awning open at the sides and bottom as signage over the transom at this storefront.

SCOPE OF WORK:

- Legalize signage.

STANDARDS FOR REVIEW:

- *Standard 9: New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*
- *Storefronts Guideline I Not Recommended: Replacing or covering a glass transom with solid material or inappropriate signage, or installing an incompatible awning over it.*
 - The large wall sign is incompatible with the historic materials, features, size, scale and proportions of the historic building, and covers over the glass transom. This application fails to satisfy Standard 9 and the Storefronts Guideline.

STAFF RECOMMENDATION: Denial, pursuant to Standard 9 and the Storefronts Guideline.
