

Imagine a family with young children is visiting your neighborhood for the first time.

Plan a day for them to see important sites in the neighborhood.

What routes would you use to get there by walking or biking? Buses can be used to shorten the trips if needed.

STEP 1

Circle neighborhood meeting points in **BLUE**. Place stickers on other landmarks or destinations that are not already marked on the map.

STEP 2

Draw points or zig-zag lines to locate barriers for walking or biking to these landmarks and destinations in **RED**.

STEP 3

Highlight routes that work well today in **YELLOW**.

STEP 4

Draw one route per person (with a line) you would like to see improved for walking today in **BLACK**. Draw another route you would like to see improved for biking today in **GREEN**.
