Administrative Review (for projects with minimal visual impact on public realm)

**Staff Notes (Optional):**

Overall design previously approved. Review is for ten (10) new locations, all at existing Indego bike share stations.

**To:** The Philadelphia Art Commission

**From:** Bicycle Transit Systems

**Date:** May 27th, 2026

**Re:** Administrative Review Request for IKE Smart City Kiosks at Various Sites

---

Dear Art Commission,

Bicycle Transit Systems (BTS) is a Philadelphia-based national bike share operator, who is contracted by the City of Philadelphia's Office of Transportation and Infrastructure Systems (OTIS) to operate Philadelphia's Indego bike share. IKE Smart City, an out of home advertising agency, is contracted by BTS to deliver static and digital advertising on Indego bikeshare stations. The Art Commission provided final concept approval for the deployment of IKE Smart City Kiosks on Indego bike share stations. BTS is seeking admin approval from the Art Commission to deploy IKE Smart City Kiosks at the following locations:

- Civic Center & Service
- Baltimore & 40<sup>th</sup>
- 45<sup>th</sup> & Baltimore
- 22<sup>nd</sup> & Fairmount
- 2<sup>nd</sup> & Race
- 18<sup>th</sup> & Washington
- 22<sup>nd</sup> & Federal
- Ridge & Heritage
- 42<sup>nd</sup> & Woodland
- 4<sup>th</sup> & Oregon

Please note the following:

- 4<sup>th</sup> & Oregon already had a proposal approved, but it was moved across the street due to existing utilities. The original location will not be installed.
- Other than 4<sup>th</sup> & Oregon, all of these locations have an existing Indego station.

The IKE Smart City Kiosk is an interactive digital kiosk that will be attached to the Indego bikeshare station. The kiosk will enhance the user experience for Indego customers, deliver public service information, resources, and local art, and generate advertising revenue to support the operations and expansion of Indego. The IKE Smart City Kiosk is 99.5" x 37.5" x 12.5" (H x W x D). The kiosk is made from steel and has heat-tempered dual-sided LED touchscreens. The kiosk will be mounted on a concrete foundation and will be connected to the Indego bike share station. The kiosk will resemble Indego's existing wayfinding signage while providing innovative and state-of-the-art aesthetics and functionality that Indego currently lacks.

BTS will be submitting a full submission package for these sites by Wednesday, June 3<sup>rd</sup>. I will be BTS's

contact for this application and the point of contact for the Art Commission's decision.

Sincerely,

Laura Bolles  
Planning Manager, Indego Bike Share, Bicycle Transit Systems

OUR MISSION:

# WE PIONEER SMART CITY TECHNOLOGY TO IMPROVE LIVES IN CITIES.

IKE Smart City was formed in 2015 by Orange Barrel Media (OBM). OBM is a leading national media company with a portfolio of unique displays in top urban markets across the U.S. Since its inception in 2004, OBM has grown its inventory with a commitment to public/ private partnerships that provide value to cities, property owners, and advertisers alike.

Through its work in cities across the country, OBM identified an opportunity to merge street furniture advertising with interactive wayfinding and information resources. The team behind OBM formed sister company, IKE Smart City, to fill this need. IKE Smart City focuses entirely on delivering innovative and equitable smart city technology solutions while maximizing DOOH ad revenues in the urban core of cities.

IKE launched in Denver as a wayfinding and communication system for the digital age, an alternative to outdated and inefficient static maps as well as a world-class advertising platform. In addition to serving as a new amenity for the public, IKE quickly became an in-demand medium for advertisers seeking dynamic street-level opportunities in commercial districts.

IKE Smart City is known in the industry for its superior revenue delivery, exemplary design, and unmatched deployment expertise. We offer turnkey end-to-end programs that provide value to partners and the public through our ever-evolving media platform.

**Our success has been sustained by building strong relationships with our city partners.**

# COMMUNITY ENGAGEMENT

Collaboration has been key to the successful deployment of IKE networks across the United States. The IKE team has experience working closely with council members, management districts, local businesses, property owners, and community advocacy groups to ensure the first wave of the IKE network delivers upon their unique needs. From kiosk locations, neighborhood-driven cabinet branding, and customized on-screen content to local art partnerships and modified advertising category restrictions, we ensure every aspect of our IKE programs reflects stakeholder input.

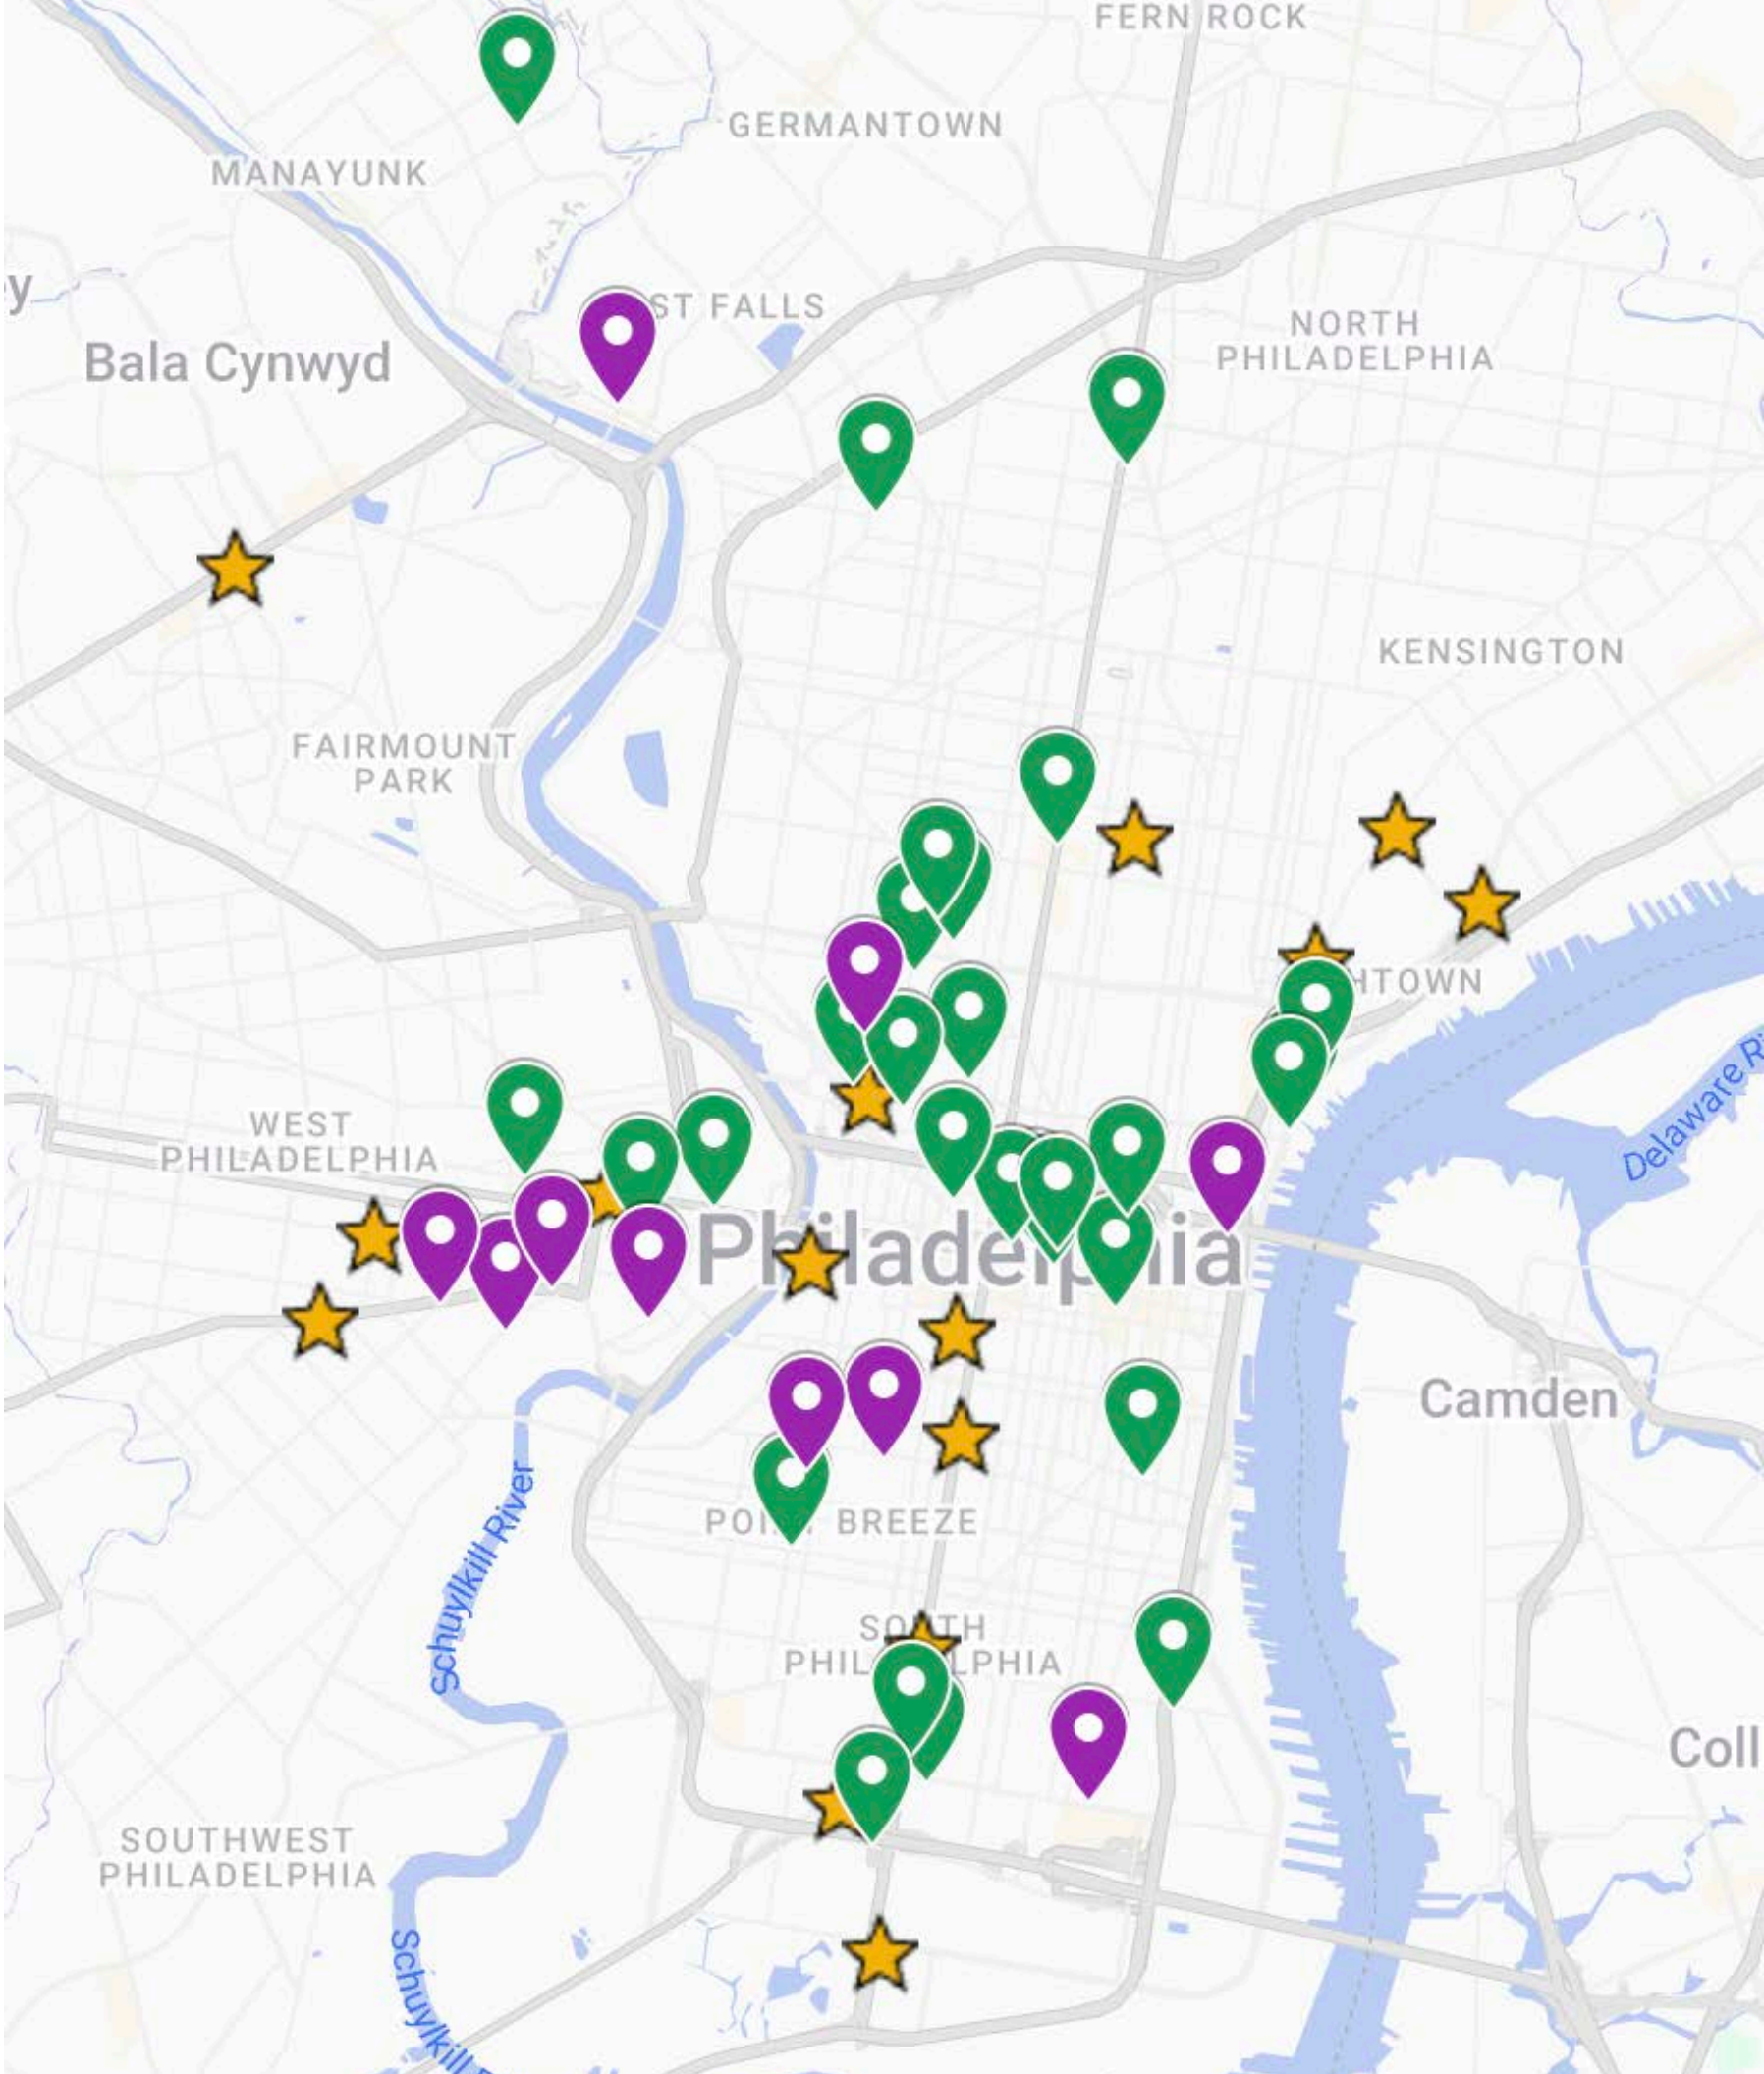

In Philadelphia, Indego actively worked with Registered Community Organizations (RCOs) and community stakeholders to get the bike stations installed. Indego and IKE Smart City have identified RCOs and community stakeholders for each proposed IKE site. Indego's partnership with them will continue as the IKEs are installed.

## KEY

-  Live Pins: Yellow Stars
-  Green Pins: Planned Locations
-  Purple Pins: Proposed Locations

## EXISTING BIKE SHARES + IKE SITES

These existing Indego bike share sites were selected to be upgraded with IKE Smart City Kiosks because they:

- Meet the required Right-of-Way standards of the City of Philadelphia
- Are optimal for public visibility and utilization

**\*Note that most proposed locations are on a state-operated or federally funded roadway\***

- While Indego cannot currently deploy IKE kiosks on state-operated or federally funded roadways, Indego and IKE Smart City are working at the state and federal levels to create a pathway for future deployment on these roadways.

# PROCESS & NEXT STEPS

## Review & Permitting Process

- Following Art Commission review and approval, Indego/IKE Smart City kiosk sites undergo several additional reviews prior to installation. Art Commission approval is a prerequisite for each of the subsequent steps:
  1. OTIS and Office of Complete Streets right-of-way pre-review
  2. Art Commission review
  3. PECO review to identify power source
  4. GPIS (Streets Dept) review to permit road surface-related activities
  5. PWD (Water Dept) review to check for utility conflicts
  6. JMT (Third Party Engineering Consultant) peer design review
  7. ECLIPSE (Streets Dept) review to permit construction
  8. Street & traffic closure review to permit street and sidewalk closures
  9. OTIS and Office of Complete Streets right-of-way final review

## Drop-Off Rate

- Due to the multiple phases of review and permitting, Indego / IKE Smart City kiosks have a material drop-off rate. Issues that cannot be anticipated at the outset are often identified during review. Because of this, more locations are sited than will ultimately be deployed, with an expected drop-off rate of at least 10%.

## Deployment Timeline

- On average, it takes approximately 8 months from when a location is sited to when it is deployed due to the required review and permitting phases.
