

BEWARE OF PHISHING MESSAGE – Request for Quote

It has come to our attention that some vendors may have received a message from trevor.day@philadelphiagov.org regarding a request for a quote. The City of Philadelphia (City) did not send this message. We suggest that you exercise caution and do not respond to this email.

The City considers this email message a phishing scam. A phishing attack occurs when a fraudster tries to trick you into sharing personal information online. The scam attempts to lure vendors into taking certain actions, including visiting a fraudulent website to input personal information and/or to download malicious programs. Other messages request that the vendor remit payments and provide remittance information within the body of the message in the form of a routing and account number. **If you clicked on a link and entered your email address and password from a phishing email, it is highly recommended that you change that information on any website for which you currently use that same login information.**

Please note: The City does not send requests for quotes from trevor.day@philadelphiagov.org email address. Further, the City Procurement Department does not use any email addresses with the “@philadelphiagov.org” domain.

If you have any questions regarding any email sent by any phila.gov email, please contact our customer service desk at 215-686-4720.
